

Visit Planning & Scheduling

Two-stage engine — HQ defines **who / when / how often**; the system generates dated visits per rep.

Visit Planning Engine — Block Diagram

INPUTS

INPUT 01
Outlet Segment
Gold / Silver / Bronze

INPUT 02
Visit Frequency
Weekly / Bi / Monthly

INPUT 03
Territory / Rep
Owner + backup

INPUT 04
Business Rules
Operating hours · KPIs

CORE ENGINE
Visit Planner

Calculates **visit demand** per outlet × frequency, matches to **rep capacity**, respects operating hours & SLA, then emits scheduled visits for the planning horizon (typically 4-week rolling).

OUTPUTS

OUTPUT 01
Scheduled Visit
1 record per outlet × date

OUTPUT 02
Visit Template
Task list per visit type

OUTPUT 03
Route Sequence
Optimized day plan

OUTPUT 04
Rep Mobile Sync
Offline visit package

Frequency example → A Gold outlet with **Weekly** frequency + **4-week** horizon = **4 scheduled Visit records** auto-generated per outlet. Non-working days & holidays are skipped based on the org calendar.

Visit Scheduling — Sample Week

TIME	MON	TUE	WED	THU	FRI
09:00	Store #001		Store #045		Store #112
10:30		Store #208		Store #320	
12:00	— lunch / travel buffer —				
14:00	Store #412		Store #518		Store #621
16:00		Store #734		Store #851	

■ Gold outlet visit · ■ Silver visit

SCHEDULED VISIT — KEY FIELDS

visit_date · start_time

outlet_id · owner (rep) · status

visit_type · template_id

planned_duration · SLA_window

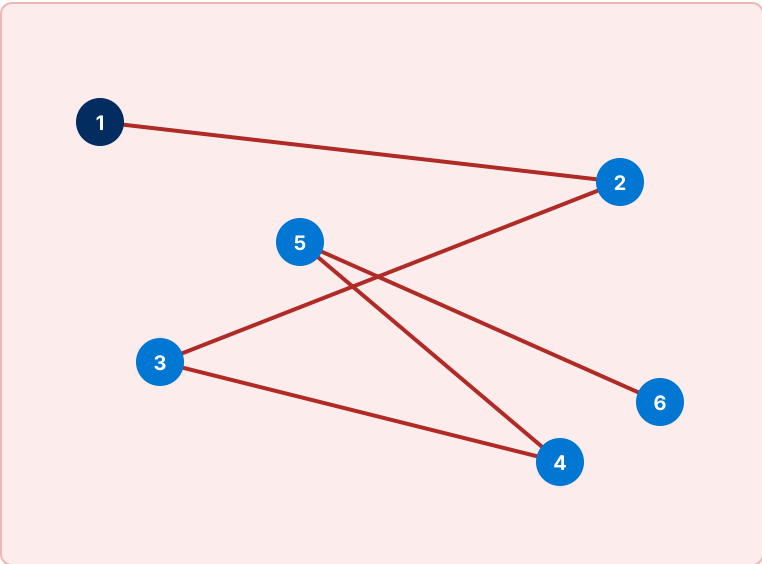

recurrence_rule (RRULE)

Route Planning & Visit Templates

Sequence outlets into an optimal daily route; standardize each visit's actions with a reusable Template.

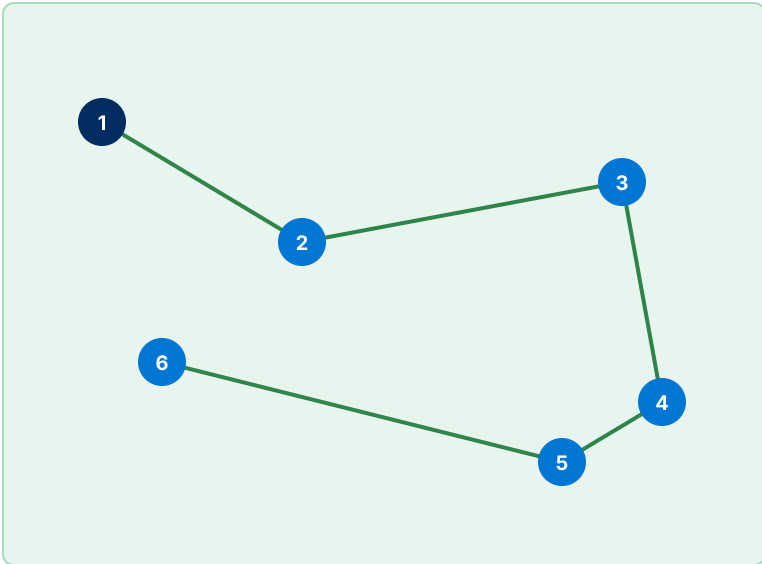

Route Optimizer — Before / After Diagram

BEFORE — MANUAL ORDER

142 km · 5h drive · 6 visits
Doubles back 3× · misses SLA window at #4

AFTER — OPTIMIZED (EINSTEIN)

87 km · 3h drive · 6 visits
-39% distance · zero backtrack · all SLAs met

OPTIMIZER FACTORS

Geo distance
Haversine + traffic

Operating hours
Store open windows

Segment priority
Gold before Silver

Visit duration
Template-driven

Powered by: Field Service Scheduler + optional MapAnything / Salesforce Maps overlay

Visit Template — Anatomy

TEMPLATE

Weekly MT Hyper Visit · ~ 45 min

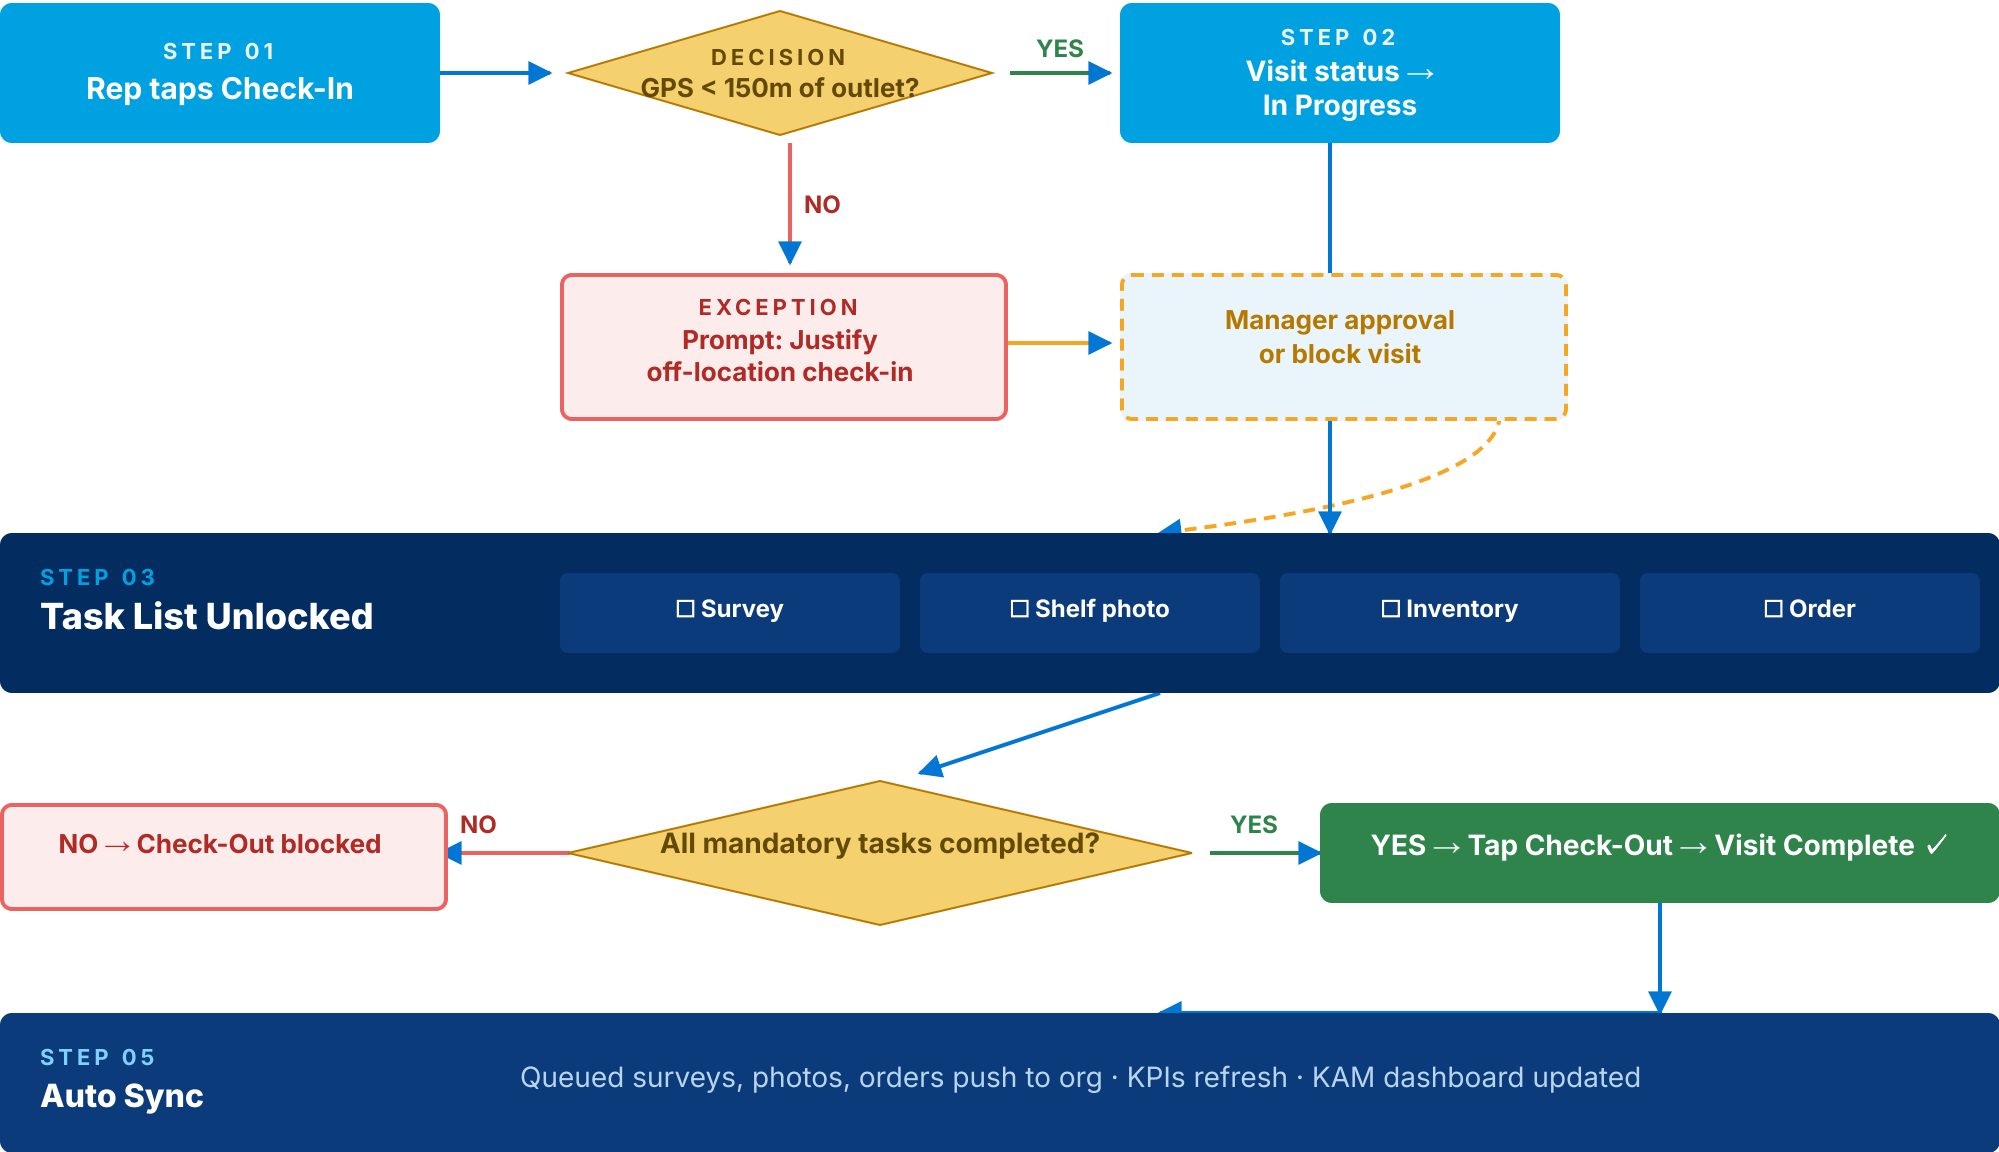

- 1 Check-In (GPS verified)**
Assessment Type · 1 min · mandatory
- 2 Greet Store Manager & brief on visit**
Task · 3 min · optional
- 3 Shelf Audit & Planogram Compliance Survey**
Assessment · 10 min · mandatory · 12 questions
- 4 Capture Shelf Photo (AR)**
Photo Task · 2 min · mandatory · Image Recognition on
- 5 Inventory Count & OOS Check**
Assessment · 5 min · mandatory · must-stock SKUs
- 6 Competitor Intelligence Survey**
Assessment · 5 min · optional · price + promo capture
- 7 Order Capture**
Task · 12 min · conditional (if reorder trigger fires)
- 8 Check-Out (GPS + summary)**
Assessment Type · 2 min · mandatory · triggers sync

Templates are cloned onto each Visit at scheduling time — edits do NOT retro-update already-scheduled visits.

Task Management & Check-in / Check-out

Every visit starts with Check-In and ends with Check-Out — both are validated events that guard the task list.

Check-In / Check-Out Validation Flowchart

Task Management Anatomy

TASK TYPES

**Assessment**
Surveys with responses

**Standard Task**
Simple checkbox

**Photo Task**
Camera capture

TASK RECORD — KEY FIELDS

task_type · Assessment / Standard / Photo

is_mandatory · gates Check-Out if true

sequence · display order in rep app

status · Open · In Progress · Completed · Skipped

skip_reason · captured when skipped

GUARDRAILS

Tasks unlock **only after Check-In** succeeds

Check-Out **blocked** until mandatory tasks done or skipped

Skipping a mandatory task **requires a reason** (audit trail)

Geo Location Tracking

GPS geofence validation for check-in, breadcrumb tracking during the visit, and compliance evidence.

Geofence Check-In Validation

● Outlet coordinates · ● Inside geofence — **Check-In ALLOWED** · ● Outside — **requires justification**
----- Breadcrumb trail (rep movement, sampled every 60s during visit)

Default radius: 150 m · **Configurable per store type** (MT Hyper 200m · GT Kirana 100m)

Geo Data Pipeline & Uses

01 · CAPTURE (Mobile Device)

Check-In pin
lat/long + accuracy + timestamp

Breadcrumbs
sampled every 60s · low battery mode

Check-Out pin
closes visit polygon

02 · STORE (Visit & Location Records)

Visit.checkin_geo · Visit.checkout_geo · VisitLocationHistory (child records — 1 row per breadcrumb)

03 · CONSUMED BY

Visit Fraud Detection
Flags check-in outside geofence

Manager Dashboard
Live team map + compliance %

Time-in-Store KPI
Actual vs. planned duration

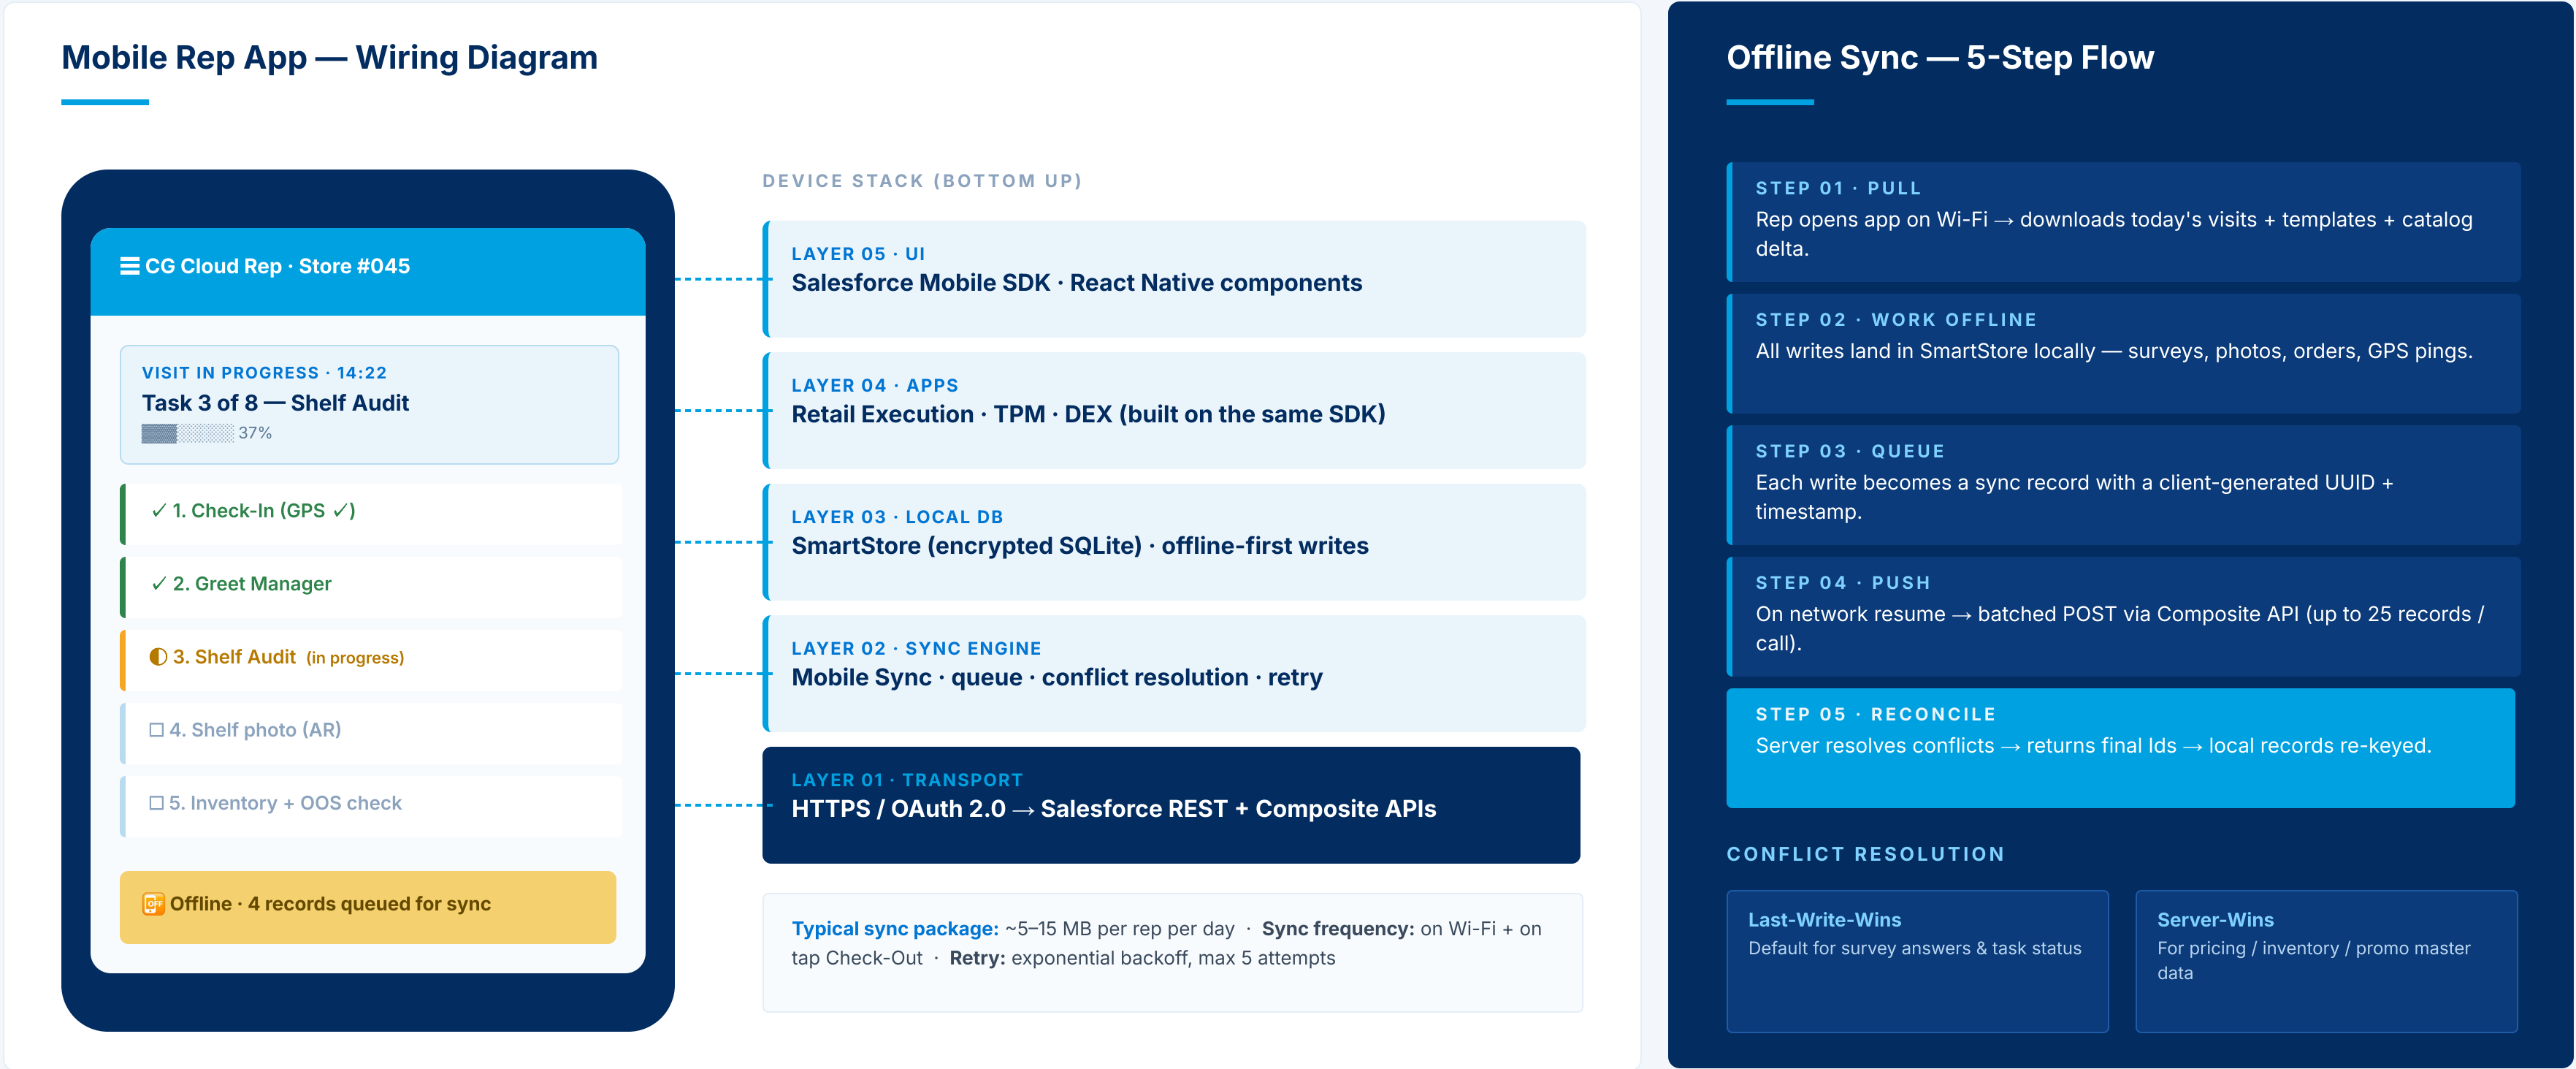

Route Adherence

Improves next route optimization

Mobile Sales Execution — Wiring Diagram

How the offline-first mobile app is wired to the org — sync engine, local DB, conflict resolution.

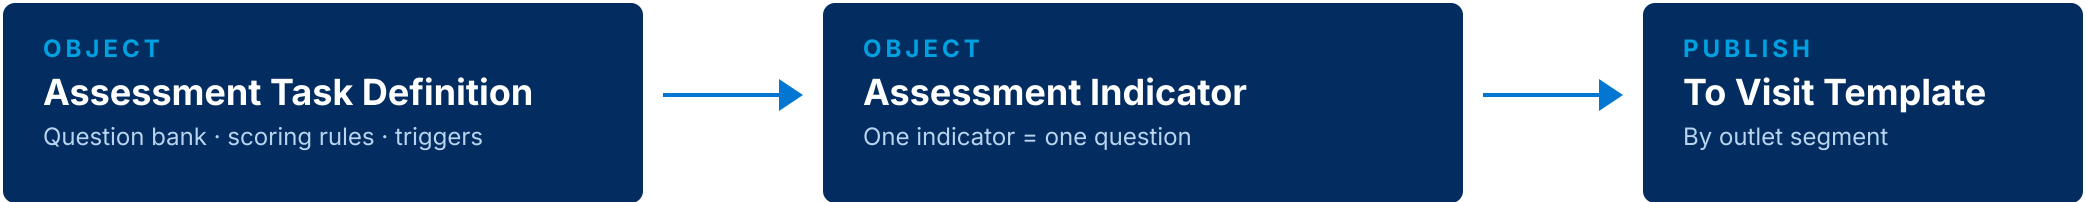

Store Audits & Surveys

Assessment Task + Assessment Indicator objects turn a paper checklist into structured, scoreable data.

Survey Engine — Block Diagram

DESIGN (HQ)

SUPPORTED QUESTION TYPES

**Single-select**
Radio button

**Multi-select**
Checkboxes

**Numeric**
Count / measure

**Photo**
Image upload

**Free text**
Notes / reason

SAMPLE — Shelf Audit & Planogram Compliance (12 indicators, weighted score)

Q1 · Numeric · How many facings of FizzCola Original 500ml on the shelf?	Expected ≥ 4
Q2 · Single-select · Is the FizzCola secondary display in place?	Yes / No / N/A
Q3 · Photo · Capture shelf photo of Beverages aisle	MANDATORY
Q4 · Multi-select · Which competitor promos are currently active?	Choose all that apply

Score: $\sum (\text{indicator_answer} \times \text{indicator_weight}) / \sum (\text{indicator_weight}) \times 100 = \text{Compliance \%}$

Common Audit Templates

AUDIT 01
Planogram Compliance
Facings · sequence · position · secondary displays

AUDIT 02
Price Compliance
Shelf tag vs. recommended price · promo pricing

AUDIT 03
Promotion Execution
POSM presence · endcap · gondola execution

AUDIT 04
Freshness / Expiry Check
Batch date · rotation · near-expiry SKU list

AUDIT 05
Store Hygiene & Brand Assets
Cooler cleanliness · branding condition · signage

Every audit can trigger a Corrective Action Case automatically when score drops below threshold — see Slide 10.

Merchandising Execution & Inventory Checks

Two connected workflows — merchandising sets the shelf; inventory keeps it filled.

01 • MERCHANDISING EXECUTION — Flowchart

STEP 01
Load Planogram

Rep opens the reference planogram image + SKU list for this outlet type.

STEP 02
Reset Shelf

Face SKUs · fix sequence · fill gaps · place POSM & secondary display.

STEP 03
Photo Before / After

Two mandatory photos — Image Recognition compares vs. planogram.

STEP 04
Score Compliance

IR returns SoS %, facings, share-of-shelf; system saves indicator responses.

STEP 05
Trigger Actions

If score < 80% → Case created for Territory Manager

If OOS SKU detected → auto-add to Order Cart

KPI

Share of Shelf

Own brand facings ÷ total facings

KPI

Planogram %

Actual vs. reference layout

KPI

Perfect Store

Composite of 5 sub-metrics

02 • INVENTORY CHECK — Block Diagram

INPUT
Rep count
On-shelf + back-room qty per SKU

COMPARE
vs. Assortment
Must-stock SKU list for outlet

RESULT
Delta Report

DELTA REPORT (SAMPLE)

SKU	EXPECTED	ACTUAL	DELTA	STATUS
FizzCola Original 500ml×12	24	22	-2	LOW
FizzCola Zero 330ml×6	12	0	-12	OOS ✗
PureWater Still 500ml×12	18	20	+2	OK ✓
PureWater Sparkling 1.5L×6	6	1	-5	LOW
FizzCola Original 330ml×24	24	26	+2	OK ✓

DOWNSTREAM TRIGGERS

Shopping cart icon

Auto-add to Order

Suggested reorder qty

Warning icon

OOS Alert Case

Assigned to KAM

Line graph icon

Forecast Feedback

Corrects TPM baseline

Suggested reorder qty = (avg_weekly_sales × visit_frequency_weeks) – actual_on_hand + safety_stock

Shelf Compliance & Out-of-Stock Management

Two-tier scoring — shelf compliance measures the plan; OOS management measures the miss.

01 · SHELF COMPLIANCE — 5-Dimension Model

Distribution
92%

Sequence
72%

POS
67%

Price Tag
85%

Facing
78%

SCORE
79%

D1 · Distribution — must-stock SKUs present

D2 · Facings — number of forward-facing units

D3 · Sequence — SKU order matches planogram

D4 · POSM — signage & secondary displays live

D5 · Price Tag — visible & matches system price

COMPLIANCE THRESHOLDS

≥ 90%
Perfect Store
No action

70–89%
Warning
Coach on next visit

< 70%
Non-compliant
Auto-open Case → KAM

Scores roll up: Outlet → Territory → Region → HQ dashboard. Perfect-Store % is a top-line KPI on the Sales VP cockpit.

02 · OUT-OF-STOCK MANAGEMENT — Flow

DETECTION

Rep visual check
During shelf audit

Image Recognition
Gap detection on photo

POS feed / EDI
Retailer-shared data

↓

CLASSIFY ROOT CAUSE

CAUSE A
Backroom Stock
Store didn't restock shelf

CAUSE B
Store OOS
Reorder needed now

CAUSE C
Distributor Gap
Supply chain issue

CAUSE D
SKU Delisted
Store dropped SKU

↓

AUTO-RESPONSE

If A → Rep restocks shelf now & logs task

If B → SKU auto-added to Order at avg reorder qty

If C → Case opened → Distributor Ops team

If D → KAM Case + delist review workflow

Target OOS rate < 5% · measured weekly per outlet segment

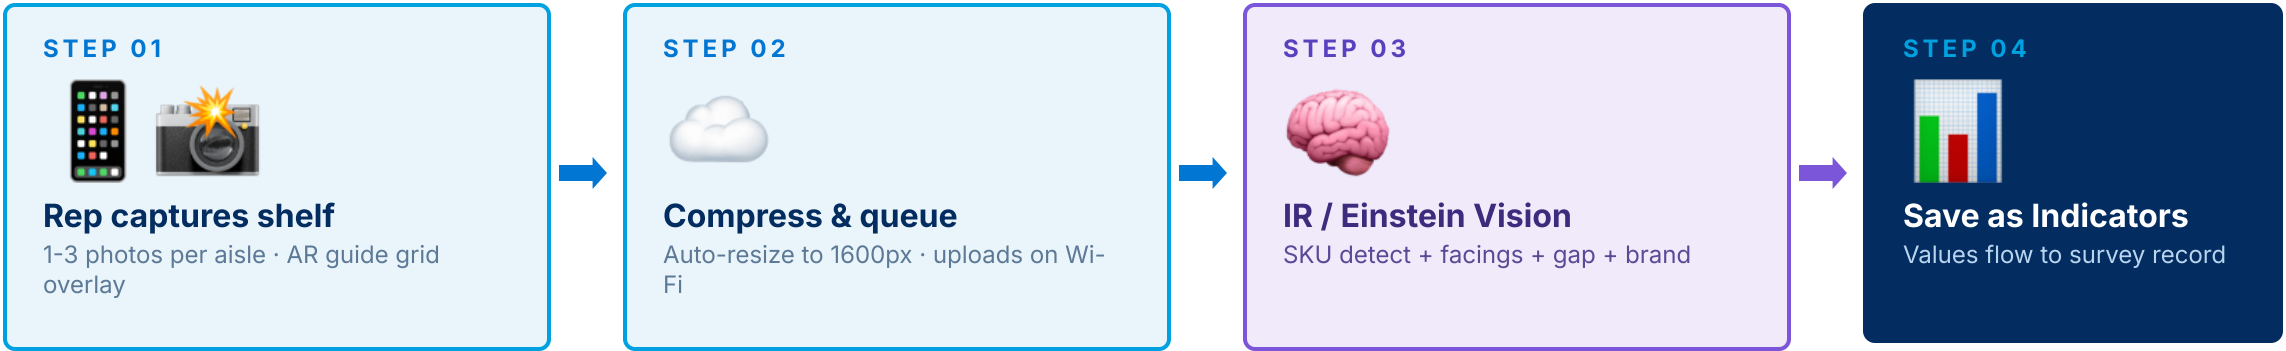

Salesforce CG Cloud & TPM — Module 3 & 4 (Visit Planning & Retail Execution)

08 / 10

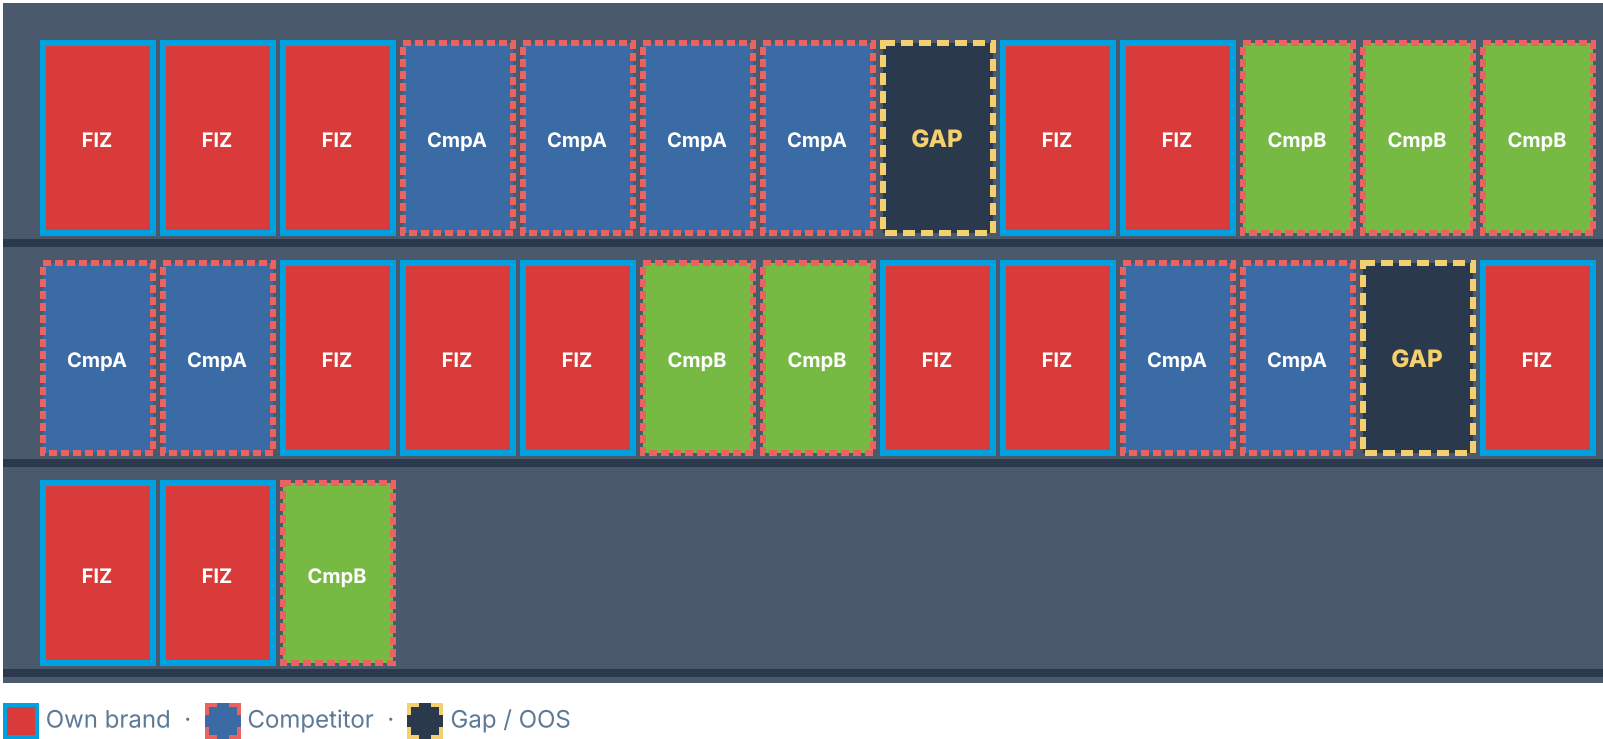

Competitor Intel & Photo / Image Recognition

A single shelf photo powers both competitor tracking and automated share-of-shelf scoring.

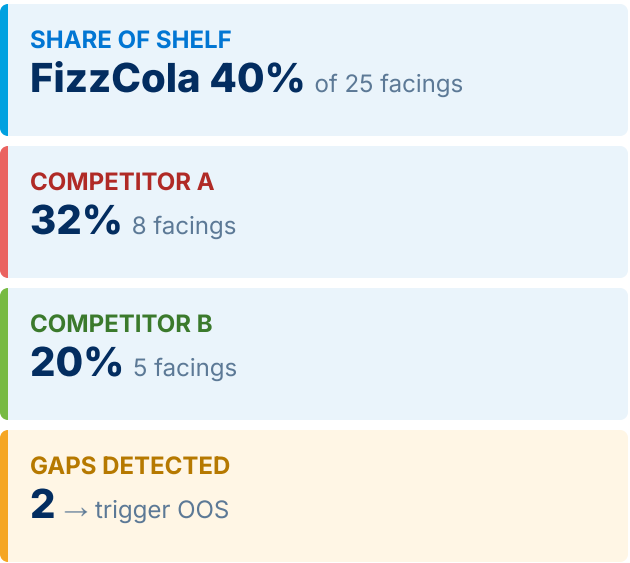

Photo Capture → Image Recognition Pipeline

SAMPLE — ANNOTATED SHELF (IR OUTPUT)

IR-EXTRACTED METRICS

Competitor Intelligence Survey

WHAT REPS CAPTURE

- Competitor Price**
Shelf tag price for equivalent SKUs
- Active Promos**
Type · discount % · end date · POSM
- New Launches**
New SKU · pack size · flavor / variant
- Space Allocated**
Facings + shelf position from IR
- Photo Evidence**
Auto-attached to survey response

FEEDS DOWNSTREAM TO

- KAM Battle Card**
Weekly refreshed
- TPM Pricing Model**
Response promo depth

Corrective Actions — Closed Loop

Every non-compliance event is turned into an Action Plan & Case that is tracked to resolution.

Detect → Assign → Fix → Verify → Close (Flowchart)

Corrective-Action KPIs

ESCALATION MATRIX

SEVERITY	SLA	OWNER
🔴 Critical (<50%)	24h	KAM
🟡 High (50-69%)	48h	Territory Mgr
🟡 Medium (70-84%)	7 days	Rep
🟢 Low (85-89%)	Next visit	Rep

All actions carry photo & GPS evidence — full audit trail available in Cases dashboard for compliance reviews.
