

## **CAPSTONE PROJECT-1**

### **SmartRetail 360 – End-to-End Consumer Goods Retail Execution & Field Sales Transformation**

#### **1. Project Overview**

**Client:** NovaFresh Consumer Products Pvt. Ltd.

**Industry:** FMCG / Consumer Goods

**Business:** Packaged Foods, Beverages & Personal Care

**Operations:** Pan-India

**Retail Outlets:** 15,000+

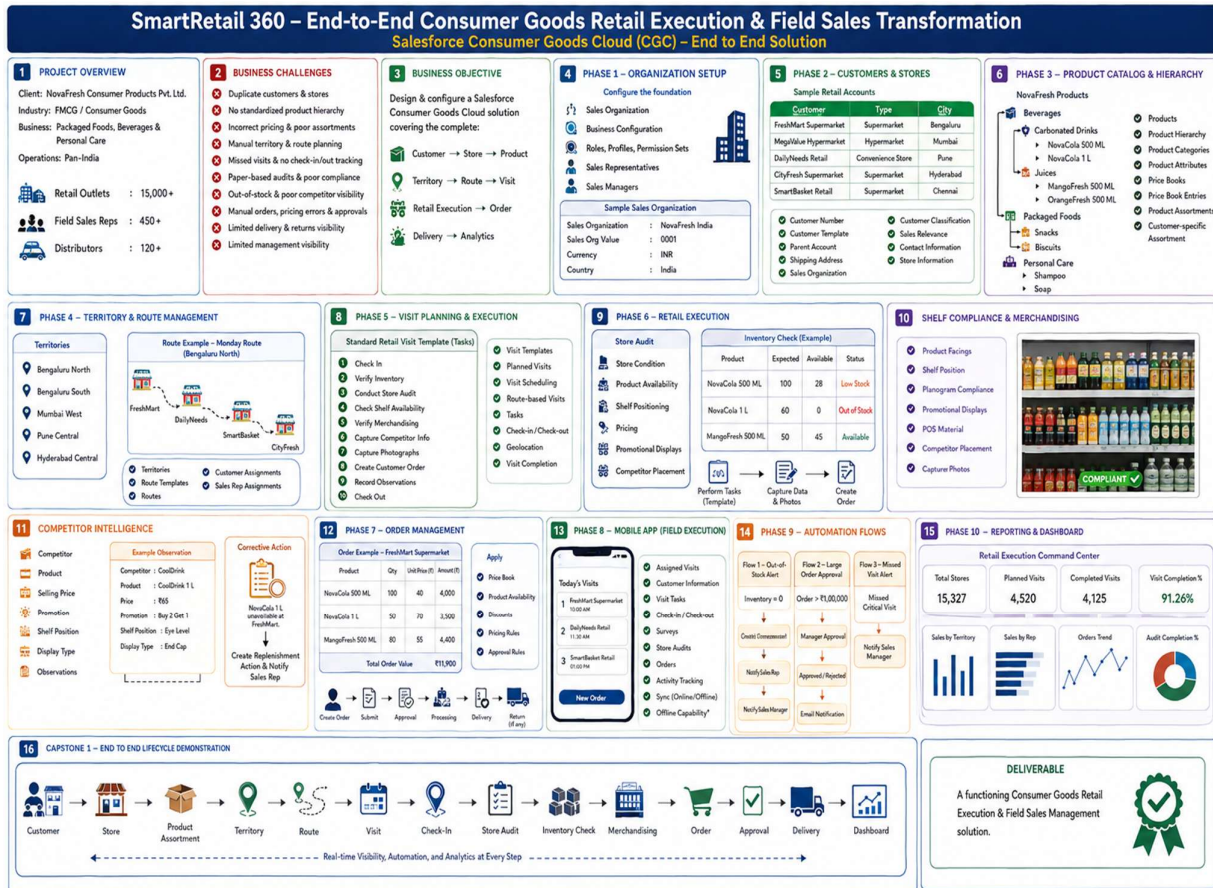

**Field Sales Representatives:** 450+

**Distributors:** 120+

NovaFresh Consumer Products distributes beverages, packaged foods, personal care products, and household products through supermarkets, hypermarkets, convenience stores, and traditional retail outlets.

The company currently relies on spreadsheets, phone calls, messaging applications, and disconnected distributor systems to manage field sales activities.

Management wants to implement **Salesforce Consumer Goods Cloud** as a centralized Retail Execution and Field Sales platform.

## 2. Current Business Challenges

NovaFresh is experiencing:

- Retail customer information distributed across multiple systems
- Duplicate retailer and store records
- No standardized product hierarchy
- Incorrect or outdated price information
- Poor product assortment management
- Manual territory allocation
- Inefficient route planning
- Missed retail visits
- No reliable check-in/check-out tracking
- Paper-based store audits
- Poor shelf compliance

- Frequent out-of-stock situations
  - Limited competitor visibility
  - Manual order capture
  - Pricing and discount errors
  - Delayed order approvals
  - Limited delivery visibility
  - Difficult returns processing
  - Limited management visibility into field operations
- 

### 3. Business Objective

Design and configure a Salesforce Consumer Goods Cloud solution covering the complete:

**Customer → Store → Product → Territory → Route → Visit → Retail Execution → Order → Delivery → Analytics**

business lifecycle.

---

### 4. Phase 1 – Consumer Goods Organization Setup

Participants configure the foundational CG Cloud environment.

#### Configure

- Consumer Goods Cloud organization
- Sales Organization
- Business configuration
- User roles
- Profiles
- Permission Sets
- Sales representatives
- Sales managers

#### Sample Sales Organization

**Sales Organization:** NovaFresh India

**Sales Org Value:** 0001

**Currency:** INR

**Country:** India

---

## 5. Phase 2 – Customer & Retail Store Management

Create realistic retail customers.

### Sample Accounts

| Customer              | Type              | City      |
|-----------------------|-------------------|-----------|
| FreshMart Supermarket | Supermarket       | Bengaluru |
| MegaValue Hypermarket | Hypermarket       | Mumbai    |
| DailyNeeds Retail     | Convenience Store | Pune      |
| CityFresh Supermarket | Supermarket       | Hyderabad |
| SmartBasket Retail    | Supermarket       | Chennai   |

Configure:

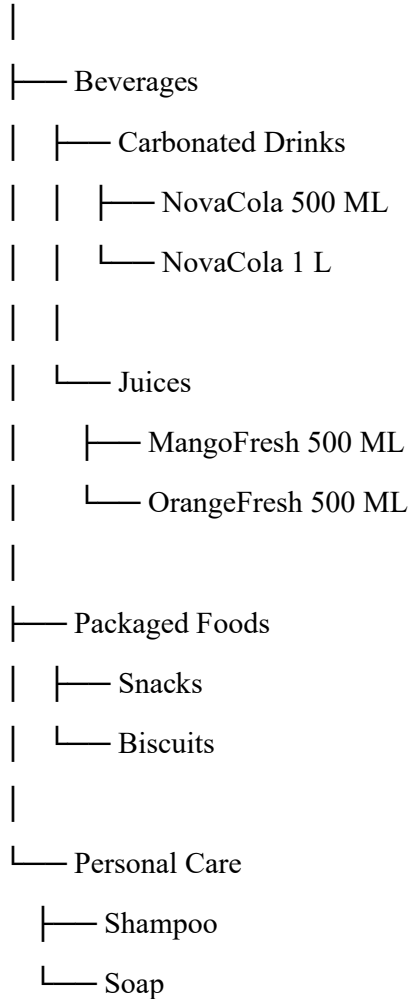

- Customer Number
  - Customer Template
  - Parent Account
  - Shipping Address
  - Sales Organization
  - Customer classification
  - Sales relevance
  - Contact information
  - Store information
-

## 6. Phase 3 – Product Catalog & Hierarchy

Create a structured FMCG product hierarchy.

### Example

NovaFresh Products

Participants configure:

- Products
- Product hierarchy
- Product categories
- Product attributes
- Price Books

- Price Book Entries
  - Product assortments
  - Customer-specific assortment
- 

## **7. Phase 4 – Territory & Route Management**

Create territories such as:

- Bengaluru North
- Bengaluru South
- Mumbai West
- Pune Central
- Hyderabad Central

Assign:

**Territory → Sales Representative → Retail Accounts**

Create routes such as:

### **Monday Route – Bengaluru North**

FreshMart

↓

DailyNeeds

↓

SmartBasket

↓

CityFresh

Participants configure:

- Territories
  - Route Templates
  - Routes
  - Customer assignments
  - Sales representative assignments
-

## **8. Phase 5 – Visit Planning & Execution**

Create Visit Templates for:

### **Standard Retail Visit**

Tasks:

1. Check in
2. Verify inventory
3. Conduct store audit
4. Check shelf availability
5. Verify merchandising
6. Capture competitor information
7. Capture photographs
8. Create customer order
9. Record observations
10. Check out

Participants configure:

- Visit Templates
- Planned Visits
- Visit scheduling
- Route-based visits
- Tasks
- Check-in
- Check-out
- Geolocation
- Visit completion

---

## **9. Phase 6 – Retail Execution**

During the visit, the field representative performs:

### **Store Audit**

Capture:

- Store condition
- Product availability
- Shelf positioning
- Pricing
- Promotional displays

### **Inventory Check**

Example:

| Product         | Expected | Available | Status       |
|-----------------|----------|-----------|--------------|
| NovaCola 500 ML | 100      | 28        | Low Stock    |
| NovaCola 1 L    | 60       | 0         | Out of Stock |
| MangoFresh      | 50       | 45        | Available    |

---

## **10. Shelf Compliance & Merchandising**

Evaluate:

- Product facings
- Shelf position
- Planogram compliance
- Promotional displays
- Point-of-sale material
- Competitor placement

Capture photographic evidence where available in the configured environment.

---

## **11. Competitor Intelligence**

Capture competitor information such as:

- Competitor
- Product
- Selling price
- Promotion

- Shelf position
- Display type
- Observations

Create corrective actions for identified issues.

Example:

NovaCola 1 L unavailable at FreshMart. Create replenishment action and notify the responsible sales representative.

---

## 12. Phase 7 – Order Management

During a retail visit, the representative creates an order.

### Example Order

**Customer:** FreshMart Supermarket

| Product           | Quantity | Unit Price |
|-------------------|----------|------------|
| NovaCola 500 ML   | 100      | ₹40        |
| NovaCola 1 L      | 50       | ₹70        |
| MangoFresh 500 ML | 80       | ₹55        |

Apply:

- Price Book
- Product availability
- Discounts
- Pricing rules
- Approval rules

Demonstrate:

**Order Creation → Approval → Processing → Delivery → Return**

---

## 13. Phase 8 – Consumer Goods Mobile

Configure and demonstrate the mobile field-sales experience covering:

- Assigned visits
- Customer information

- Visit tasks
  - Check-in/check-out
  - Surveys
  - Store audits
  - Orders
  - Activity tracking
  - Mobile synchronization
  - Offline capability where supported/configured
- 

#### **14. Phase 9 – Automation**

Create Salesforce automation for realistic scenarios.

##### **Flow 1 – Out-of-Stock Alert**

Inventory = 0

Create Corrective Action

Notify Sales Representative

Notify Sales Manager

##### **Flow 2 – Large Order Approval**

Order > ₹1,00,000

Manager Approval

Approved / Rejected

Email Notification

##### **Flow 3 – Missed Visit Notification**

Notify the sales manager when a planned critical visit isn't completed.

---

## 15. Phase 10 – Reporting & Executive Dashboard

Build a **Retail Execution Command Center**.

KPIs:

- Total Retail Stores
- Planned Visits
- Completed Visits
- Missed Visits
- Visit Completion %
- Average Visit Duration
- Orders Created
- Order Value
- Out-of-Stock %
- Shelf Compliance %
- Audit Completion %
- Sales by Territory
- Sales by Representative

---

## 16. Capstone 1 Final Demonstration

Participants demonstrate:

Customer

Store

Product Assortment

Territory

Route

Visit

Check-In

Store Audit

Inventory Check

Merchandising

Order

Approval

Delivery

Dashboard

### **Capstone 1 Deliverable**

A functioning **Consumer Goods Retail Execution & Field Sales Management** solution.
