

Case Study 1 – Retail Sales Digital Transformation for FreshMart Supermarkets

Customer: FreshMart Supermarkets Pvt. Ltd.

Industry

FMCG Retail Distribution

Background

FreshMart operates over **750 supermarkets** across India and distributes products from major FMCG brands such as Coca-Cola, Nestlé, Unilever, and ITC.

The field sales team consists of **250 Sales Representatives**, who currently use spreadsheets and phone calls to manage customer visits and order collection.

The company experiences:

- Missed store visits
- Manual order capture
- Incorrect pricing
- Poor inventory visibility
- Delayed customer servicing

The management wants to implement **Salesforce Consumer Goods Cloud** to digitize the retail execution process.

Business Challenges

- Manual customer management
- No centralized product catalog
- Duplicate customer records
- No territory-based planning
- Sales reps not following visit schedules
- Poor visibility into store activities
- No mobile sales application

Business Objectives

Implement Salesforce Consumer Goods Cloud to:

- Manage customers centrally
 - Build product catalog and hierarchies
 - Configure territories
 - Automate visit planning
 - Enable mobile-based order capture
 - Improve retail execution
-

Scope

Module Coverage

- Consumer Goods Cloud Overview
 - Consumer Goods Foundation
 - Customer Management
 - Product Management
 - Territory Management
 - Visit Planning
 - Mobile Application
-

Deliverables

- Customer onboarding
 - Product catalog
 - Product hierarchy
 - Price Books
 - Product Assortments
 - Sales Territories
 - Visit Templates
 - Mobile Sales App
 - Field Dashboards
-

Expected Benefits

- 35% reduction in visit planning effort
- 25% increase in productive store visits
- 40% reduction in manual order errors
- Better retailer satisfaction
- Real-time field visibility

Solution Steps:

Step 1: Requirement Gathering

- Conduct workshops with Sales Managers, Territory Managers, and Field Sales Representatives.
- Document the current retail sales process and identify pain points.
- Finalize the future-state business process.

Step 2: Configure Consumer Goods Cloud

- Enable Consumer Goods Cloud features.
- Configure user roles, profiles, and permission sets.
- Define organizational hierarchy and security model.

Step 3: Customer & Store Setup

- Create customer accounts and retail stores.
- Configure customer hierarchies.
- Assign stores to the appropriate sales territories.
- Define operating hours and store attributes.

Step 4: Product Management

- Create product catalog.
- Configure product hierarchy (Category → Brand → SKU).
- Configure price books.
- Create product assortments for different store formats.

Step 5: Territory Management

- Create sales territories.
- Assign customers to territories.
- Assign field representatives to territories.
- Configure territory alignment rules.

Step 6: Visit Planning

- Create visit templates.
- Configure recurring visit schedules.
- Assign daily routes to sales representatives.
- Configure visit objectives and mandatory tasks.

Step 7: Mobile Sales Configuration

- Configure Salesforce Consumer Goods Mobile App.
- Enable offline synchronization.
- Configure mobile layouts and quick actions.

Step 8: Order Capture

- Configure order entry process.
- Enable pricing and discount calculations.
- Validate product availability during order creation.

Step 9: Reporting & Dashboards

- Create field sales dashboards.
- Configure visit performance reports.
- Build territory performance reports.
- Publish management dashboards.

Expected Solution Outcome

- Automated customer management
- Standardized visit planning
- Digital order capture
- Improved field productivity
- Real-time business visibility

Case Study 2 – Retail Execution & Merchandising Optimization for CocaRefresh Beverages

Customer

CocaRefresh Beverages Ltd.

Industry

Beverages & Consumer Goods

Background

CocaRefresh supplies beverages to over **12,000 retail outlets** across India.

Store execution is inconsistent.

Problems include:

- Empty shelves
- Out-of-stock products
- Poor merchandising
- No shelf compliance
- Competitor products replacing company products
- No photographic evidence

The company wants to digitize retail execution using Salesforce CG Cloud Mobile.

Business Challenges

- Store audits performed on paper
 - Manual surveys
 - No image capture
 - Shelf compliance below 70%
 - High stock-outs
 - Competitor visibility unavailable
-

Business Objectives

Implement:

- Digital Store Audits
 - Merchandising Execution
 - Shelf Compliance
 - Inventory Checks
 - Image Recognition
 - Corrective Action Management
-

Scope

Module Coverage

- Store Audits
 - Surveys
 - Merchandising
 - Shelf Compliance
 - Inventory Checks
 - Out-of-Stock
 - Competitor Intelligence
 - Photo Capture
 - Mobile Sales
-

Deliverables

- Store Audit Templates
 - Digital Surveys
 - Inventory Checklists
 - Shelf Compliance Reports
 - Competitor Product Tracking
 - Mobile Image Upload
 - Corrective Action Workflow
-

Expected Benefits

- 95% audit completion
 - 30% reduction in stock-outs
 - 20% increase in shelf compliance
 - Better merchandising visibility
 - Faster issue resolution
-

Solution Steps:

Step 1: Retail Execution Assessment

- Analyze current merchandising process.
- Identify compliance gaps.
- Define KPIs for store execution.

Step 2: Configure Store Audit Templates

- Create audit questionnaires.
- Configure mandatory inspection points.
- Define scoring methodology.

Step 3: Survey Configuration

- Build digital surveys.
- Configure conditional questions.
- Enable mobile survey completion.

Step 4: Inventory Monitoring

- Configure inventory checklists.
- Capture stock quantities.
- Configure out-of-stock alerts.

Step 5: Shelf Compliance

- Define shelf standards.
- Configure planogram compliance checks.
- Capture shelf share measurements.

Step 6: Competitor Intelligence

- Configure competitor product catalog.
- Capture competitor pricing.
- Record promotional activities.
- Compare shelf placement.

Step 7: Image Capture

- Enable photo capture using the mobile application.
- Capture shelf images.
- Store photographic evidence.
- Configure image recognition (if enabled).

Step 8: Corrective Actions

- Automatically create corrective tasks.
- Assign actions to sales representatives.
- Track task completion.

Step 9: Reporting & Analytics

- Build compliance dashboards.
- Create stock-out reports.
- Monitor merchandising KPIs.
- Track competitor activities.

Expected Solution Outcome

- Paperless store audits
- Improved shelf compliance
- Reduced stock-outs
- Better merchandising execution
- Enhanced competitor visibility

Case Study 3 – End-to-End Order Management & Mobile Sales Automation for DairyPlus Foods

Customer

DairyPlus Foods Ltd.

Industry

Food & Dairy Distribution

Background

DairyPlus supplies milk, yogurt, butter, and dairy products to over **9,500 retail stores**.

Sales representatives currently collect orders manually.

Common issues include:

- Incorrect pricing
- Invalid discounts
- Product availability uncertainty
- Delayed approvals
- Return handling challenges

Management wants to implement Salesforce CG Cloud Order Management integrated with the mobile application.

Business Challenges

- Manual order creation
 - Duplicate orders
 - Pricing inconsistencies
 - Approval delays
 - No delivery tracking
 - Poor return management
 - Offline sales issues
-

Business Objectives

Implement:

- Mobile Order Capture
 - Pricing Automation
 - Discount Management
 - Approval Workflow
 - Delivery Tracking
 - Returns Management
 - Offline Mobile Capability
-

Scope

Module Coverage

Order Capture

Product Availability

Pricing

Discount Management

Approval Process

Delivery Tracking

Returns Management

Mobile Configuration

Offline Synchronization

Deliverables

- Customer Orders
- Price Books
- Discount Rules
- Approval Workflow
- Delivery Dashboard

- Return Processing
 - Mobile Offline Configuration
 - Sales Productivity Dashboard
-

Expected Benefits

- 50% faster order processing
 - 90% pricing accuracy
 - 30% reduction in order approval time
 - Improved delivery visibility
 - Better field sales productivity
 - Reduced order errors
-

Learning Outcomes Across All Three Case Studies

By completing these case studies, participants will learn to:

- Design the Consumer Goods Cloud data model.
- Configure customers, products, price books, and territories.
- Plan and execute field sales visits.
- Perform digital retail execution with audits, merchandising, surveys, and image capture.
- Manage customer orders, pricing, discounts, approvals, and returns.
- Configure and use the Consumer Goods Cloud Mobile Application with offline synchronization.
- Build dashboards and reports to monitor sales performance and retail execution KPIs.
- Apply Salesforce CG Cloud best practices to realistic FMCG implementation scenarios.

Solution Steps:

Step 1: Order Management Analysis

- Review current order lifecycle.
- Identify pricing and approval issues.
- Define future-state order process.

Step 2: Customer & Product Configuration

- Configure customer accounts.
- Configure dairy product catalog.
- Assign customer-specific price books.

Step 3: Pricing & Discount Rules

- Configure pricing strategies.
- Configure promotional discounts.
- Configure customer-specific pricing.
- Validate pricing during order creation.

Step 4: Mobile Order Capture

- Configure mobile order screens.
- Enable barcode/product search.
- Configure quick order templates.

Step 5: Product Availability

- Integrate inventory availability.
- Display available stock during order entry.
- Prevent ordering unavailable products.

Step 6: Approval Workflow

- Configure approval hierarchy.
- Define approval thresholds.
- Automate approval routing.
- Notify managers automatically.

Step 7: Delivery Tracking

- Integrate delivery status.
- Track shipment progress.
- Update delivery milestones.
- Notify customers of delivery status.

Step 8: Returns Management

- Configure return reasons.
- Capture damaged or expired products.
- Process return approvals.
- Generate return reports.

Step 9: Offline Mobile Synchronization

- Enable offline order capture.
- Synchronize orders automatically when online.
- Resolve synchronization conflicts.
- Monitor synchronization status.

Step 10: Reporting & Dashboards

- Create order dashboards.
- Monitor approval cycle time.
- Track delivery performance.
- Analyze return trends.
- Measure field sales productivity.

Expected Solution Outcome

- Faster order processing
- Accurate pricing
- Automated approvals
- Improved delivery tracking
- Efficient return processing
- Higher sales productivity

Case Study 4 – Annual Trade Promotion Planning & Budget Management for NutriFoods India Ltd.

Customer

NutriFoods India Ltd.

Industry

Food & FMCG Manufacturing

Background

NutriFoods India Ltd. manufactures breakfast cereals, snacks, biscuits, and health foods, distributing products through more than **18,000 retail outlets** across India.

Every year, the Sales and Marketing teams manually prepare trade promotion plans using spreadsheets. Budget allocation is decentralized, making it difficult to track promotion spending, forecast ROI, and monitor promotional effectiveness.

The management has decided to implement **Salesforce Trade Promotion Management (TPM)** to digitize the annual planning process and centralize trade spend management.

Business Challenges

- Manual annual business planning
 - Promotion budgets maintained in spreadsheets
 - No centralized promotion calendar
 - Difficulty tracking trade spends
 - Budget overruns
 - Lack of promotion visibility
 - No promotion approval workflow
 - Limited ROI analysis
-

Business Objectives

Implement Salesforce TPM to:

- Automate Annual Business Planning

- Configure Promotion Lifecycle
 - Manage Promotion Calendar
 - Allocate Trade Budgets
 - Monitor Trade Spend
 - Standardize Promotion Approval Process
 - Improve Promotion ROI Tracking
-

Scope

Module Coverage

- Introduction to TPM
 - Promotion Lifecycle
 - Trade Planning
 - Annual Business Planning
 - Promotion Types
 - Promotion Calendar
 - Trade Spend Management
 - Budget Allocation
-

Deliverables

- Annual Business Plan
 - Promotion Calendar
 - Trade Budget Configuration
 - Promotion Types
 - Budget Allocation Rules
 - Trade Spend Dashboard
 - Promotion Approval Workflow
 - Executive Reports
-

Expected Benefits

- 40% faster annual planning
 - Centralized trade budget management
 - Improved budget visibility
 - Better promotion forecasting
 - Reduced manual reporting
 - Increased promotion ROI
-

Solution / Implementation Steps

Step 1: Business Requirement Analysis

- Conduct planning workshops with Sales, Finance, and Marketing teams.
- Identify existing promotion planning process.
- Define promotion governance model.

Step 2: Configure TPM Foundation

- Enable Trade Promotion Management.
- Configure promotion master data.
- Define organizational hierarchy.

Step 3: Configure Promotion Types

Create standard promotion types such as:

- Consumer Promotion
- Trade Promotion
- Display Promotion
- Seasonal Promotion
- Festival Promotion

Step 4: Configure Annual Business Planning

- Define annual planning cycle.
- Configure planning templates.
- Assign budgets by region.

- Allocate budgets by customer segment.

Step 5: Configure Promotion Calendar

- Create annual promotion calendar.
- Schedule quarterly campaigns.
- Prevent overlapping promotions.
- Publish promotion timelines.

Step 6: Configure Trade Spend Management

- Define trade budget categories.
- Configure spending limits.
- Track committed and actual spend.
- Monitor budget utilization.

Step 7: Configure Approval Workflow

- Configure promotion approval hierarchy.
- Route promotions for approval.
- Configure escalation rules.
- Send approval notifications.

Step 8: Reporting & Analytics

- Budget utilization dashboard
- Promotion calendar dashboard
- Trade spend reports
- Promotion ROI reports
- Executive KPI dashboards

Expected Solution Outcome

- Centralized promotion planning
- Automated budget management
- Standardized approval process
- Better financial governance

- Improved promotion effectiveness
-

Case Study 5 – Customer Promotion & Pricing Optimization for Spark Beverages Ltd.

Customer

Spark Beverages Ltd.

Industry

Beverages & Consumer Goods

Background

Spark Beverages distributes soft drinks, juices, bottled water, and energy drinks to over **22,000 retail stores** through distributors across India.

The company manages numerous promotional campaigns throughout the year, including seasonal discounts, bundle offers, retailer rebates, and display incentives. Promotion creation is manual, resulting in inconsistent pricing, approval delays, and inaccurate trade spend tracking.

The company plans to implement Salesforce TPM to automate customer promotions and pricing programs.

Business Challenges

- Manual promotion creation
 - Delayed approvals
 - Pricing inconsistencies
 - Duplicate promotions
 - Manual rebate calculation
 - Limited bundle promotion support
 - No centralized promotion tracking
-

Business Objectives

Implement Salesforce TPM to:

- Automate Promotion Creation
- Standardize Promotion Approval

- Manage Customer Promotions
 - Configure Product Promotions
 - Implement Pricing Promotions
 - Manage Rebate Programs
 - Configure Bundle Promotions
 - Track Promotion Performance
-

Scope

Module Coverage

- Promotion Creation
 - Promotion Approval Workflow
 - Customer Promotions
 - Product Promotions
 - Pricing Promotions
 - Rebate Programs
 - Discount Programs
 - Display Programs
 - Bundle Promotions
-

Deliverables

- Promotion Templates
- Customer Promotions
- Product Promotions
- Discount Rules
- Pricing Rules
- Rebate Programs
- Display Promotion Programs
- Bundle Promotion Configuration

- Promotion Dashboards
-

Expected Benefits

- 50% faster promotion creation
 - Improved pricing accuracy
 - Reduced approval cycle time
 - Increased promotion visibility
 - Better trade spend tracking
 - Improved retailer satisfaction
-

Solution / Implementation Steps

Step 1: Promotion Requirement Analysis

- Identify promotion objectives.
- Define customer eligibility.
- Define promotion policies.

Step 2: Configure Promotion Templates

Create reusable templates for:

- Price Discounts
- Buy One Get One
- Bundle Promotions
- Festival Promotions
- Display Promotions

Step 3: Configure Customer Promotions

- Assign promotions to customers.
- Configure customer groups.
- Define promotion validity periods.
- Configure customer eligibility rules.

Step 4: Configure Product Promotions

- Select promotional products.
- Configure product groups.
- Define product eligibility.
- Assign promotional pricing.

Step 5: Configure Pricing Promotions

- Configure percentage discounts.
- Configure fixed amount discounts.
- Configure promotional pricing periods.
- Validate pricing rules.

Step 6: Configure Rebate Programs

- Define rebate percentages.
- Configure rebate eligibility.
- Calculate rebate amounts.
- Generate rebate reports.

Step 7: Configure Discount & Bundle Programs

- Configure volume discounts.
- Configure bundle offers.
- Configure cross-product promotions.
- Validate promotion combinations.

Step 8: Configure Display Programs

- Define display objectives.
- Configure display compliance.
- Capture display execution.
- Track display effectiveness.

Step 9: Promotion Approval Workflow

- Configure approval hierarchy.
- Define approval thresholds.
- Automate promotion approvals.

- Notify approvers.

Step 10: Reporting & Analytics

- Promotion effectiveness dashboard
 - Customer promotion reports
 - Product promotion reports
 - Trade spend analysis
 - Promotion ROI dashboard
 - Executive KPI reports
-

Expected Solution Outcome

- Automated promotion management
- Faster approval process
- Consistent promotional pricing
- Accurate rebate calculations
- Better promotion execution
- Improved trade spend visibility
- Higher promotion ROI
