

Sales Uplift — 3-Phase Time Series

Decompose every promo into 3 phases: pre-buy · lift · post-dip · net incremental is the true measure.

02 · UPLIFT DECOMPOSITION

COMPONENT	% of Gross Lift
New buyer (net new)	35% · GOOD
Basket expansion	20% · GOOD
Brand-switch (competitor)	15% · GOOD
Pantry loading	18% · NEUTRAL
Sister-SKU cannibalization	12% · BAD

TRUE INCREMENTAL RATIO

70%
"Real" incremental (rows 1-3)
Excludes pantry + cannibalization

WATCH-OUTS

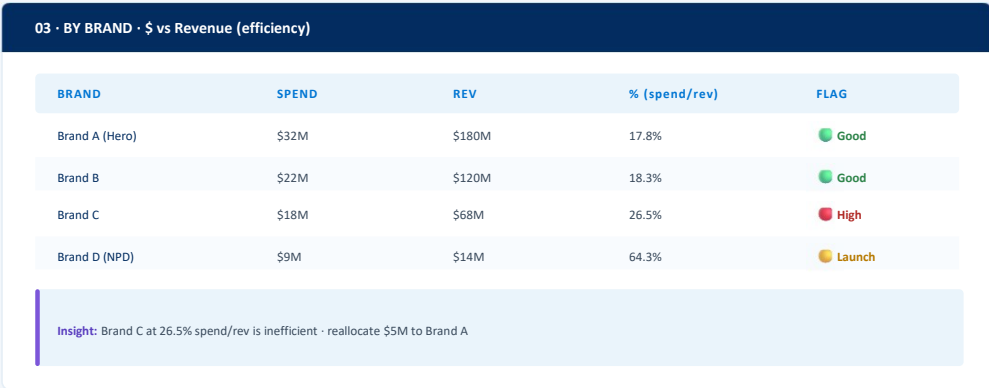

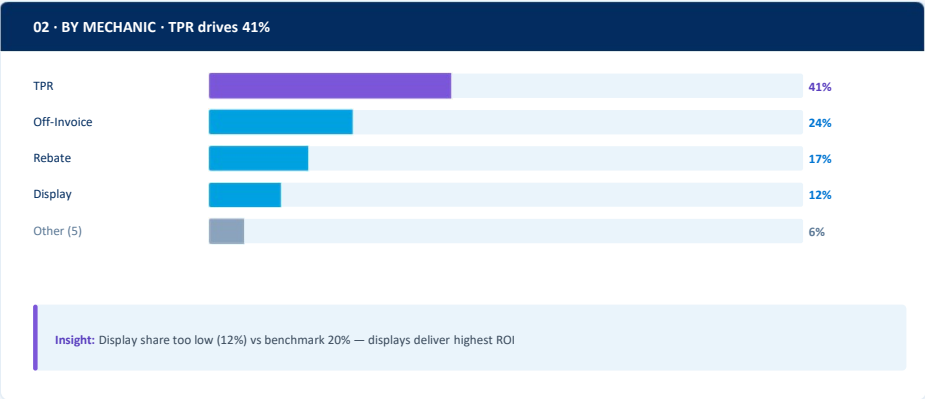

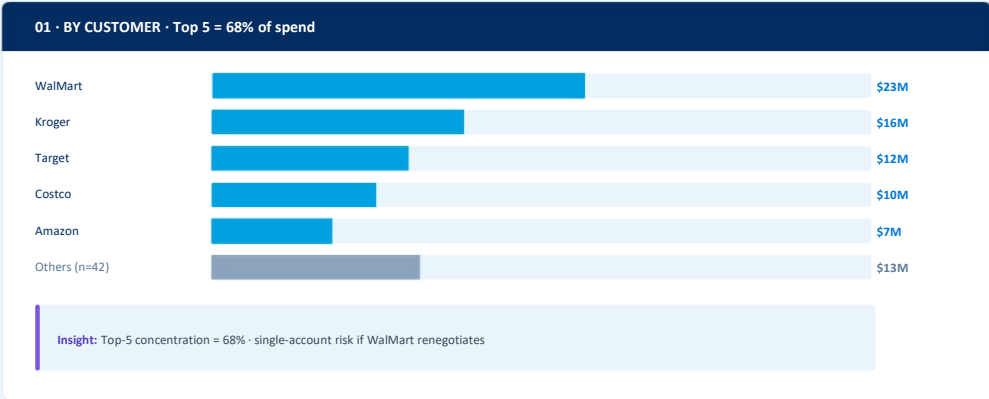

Cannibalization > 20% → split promo (see slide on Product Promotions)

Pantry > 25% → extend baseline window for accurate lift

Best promos: ≥ 50% new-buyer share

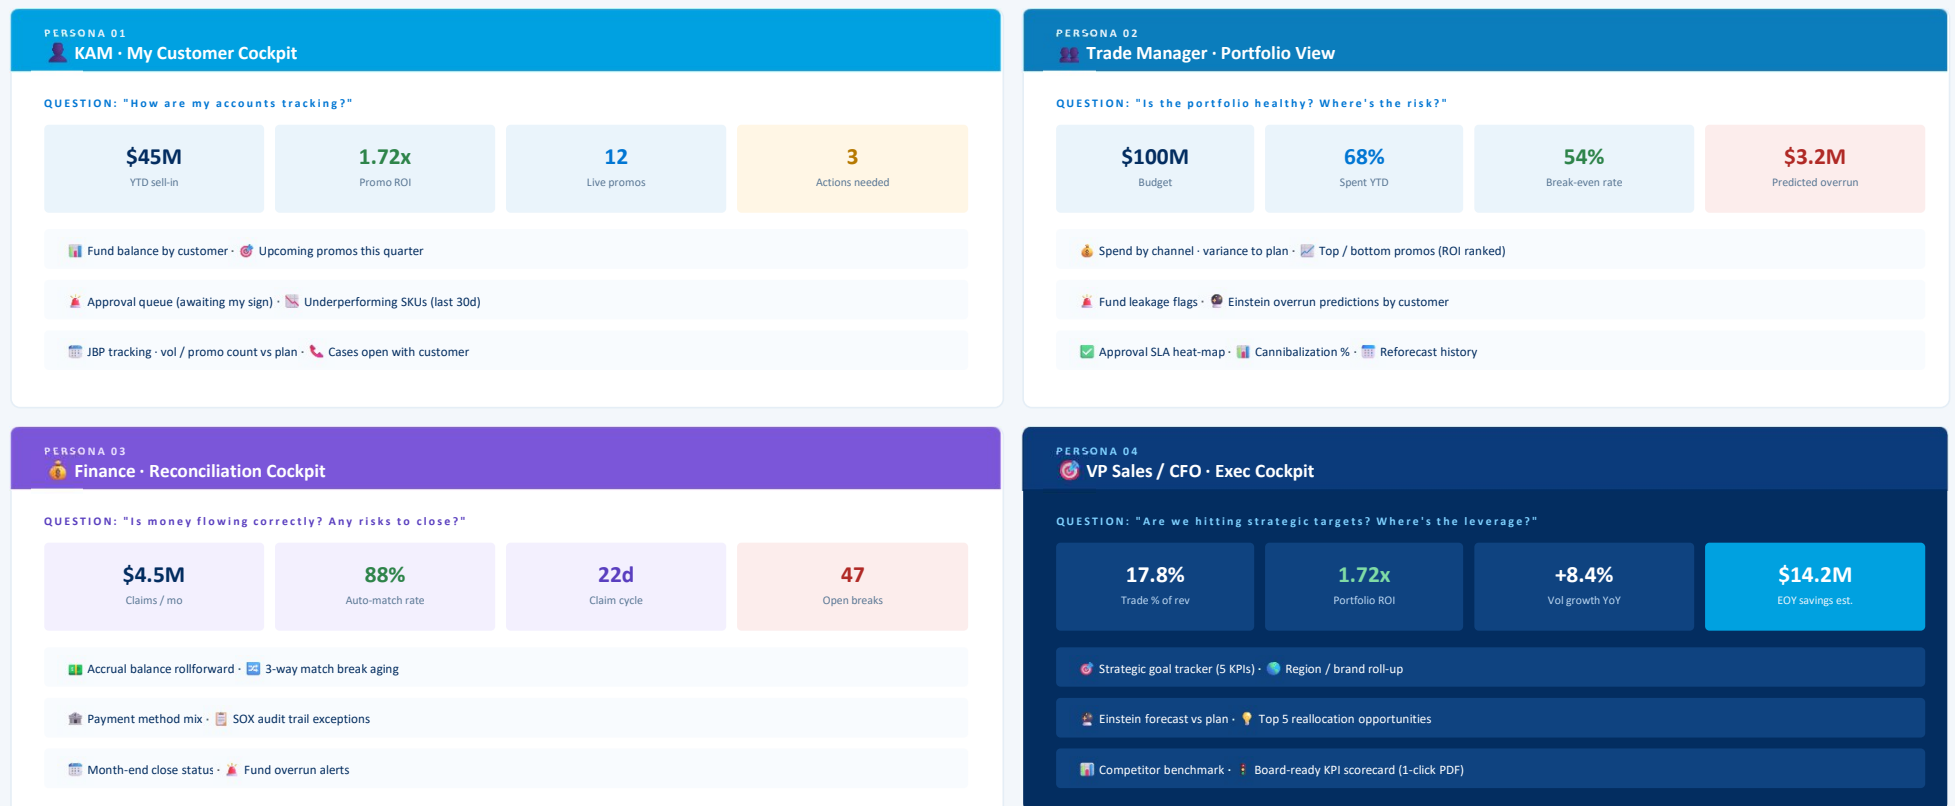

Trade Spend Analysis — 4-Cut Views

Same \$ pool sliced 4 ways · reveals where the money really goes and where to reallocate.

Dashboards — Persona-Based Views

4 personas · 4 dashboards · same underlying data · different questions answered.

Reports — Catalog & Delivery Pipeline

4 report categories · 3 delivery modes · always sourced from live objects — no data copies.

01 · 4 REPORT CATEGORIES

CATEGORY 01

OPERATIONAL

Frequency: **Daily** · Audience: KAMS, Trade Analysts

- Promotion pipeline · status by stage
- Claim aging · SLA tracker
- Approval queue by owner
- Fund balance snapshot
- Retailer compliance rate

CATEGORY 02

TACTICAL

Frequency: **Weekly / Monthly** · Audience: Trade Mgrs, Sales Directors

- Post-event ROI scorecard
- Sales uplift decomposition
- Cannibalization heat-map
- Deduction match rate trend
- Promotion effectiveness ranking

CATEGORY 03

FINANCIAL

Frequency: **Monthly close** · Audience: Finance, CFO

- Trade spend accrual rollforward
- Reconciliation break aging
- Fund-level P&L · GL tie-out
- SOX audit trail evidence pack

CATEGORY 04

STRATEGIC

Frequency: **Quarterly** · Audience: Board, Exec Team

- Trade ROI vs benchmark
- Customer profitability ranking
- Category / brand mix analysis
- YoY growth vs trade % of rev

02 · 3 DELIVERY MODES

MODE 01 · PULL

Interactive report

Live in Salesforce · drill-through to record

Best for: exploration · ad-hoc analysis

MODE 02 · PUSH

Scheduled email / Slack

Auto-sent on cadence · PDF or inline HTML

Best for: exec briefings · Monday KAM prep

MODE 03 · API / EXPORT

Data feed / Tableau · PBI

REST API · CRM Analytics · warehouse extract

Best for: enterprise BI · combined datasets

Forecasting — Einstein Pipeline

6 features · gradient-boosted trees · retrained nightly · 3 horizon outputs.

01 · EINSTEIN FORECAST PIPELINE — Wiring

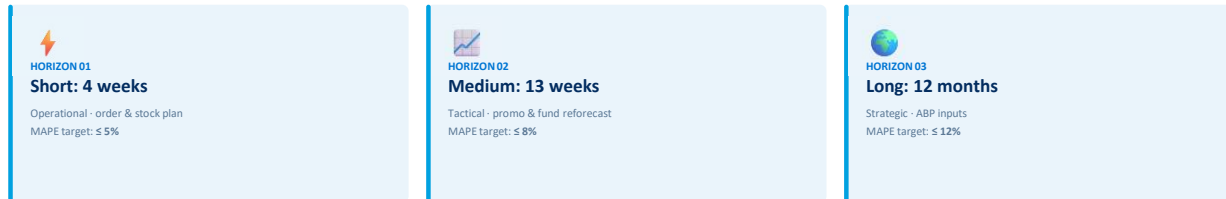

6 INPUT FEATURES

MODEL
Einstein Discovery
 Gradient-boosted trees · retrained nightly

~200K training rows · 12-month lookback + walk-forward validation
MAPE target: ≤ 8% at SKU × week grain

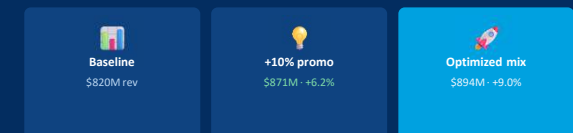

3 FORECAST HORIZONS

Auto-refresh: Every night at 02:00 · full pipeline + explainability report per SKU

02 · SCENARIO PLANNER + EXPLAINABILITY

WHAT-IF SCENARIOS

TOP FEATURE IMPORTANCE

ACCURACY MONITOR

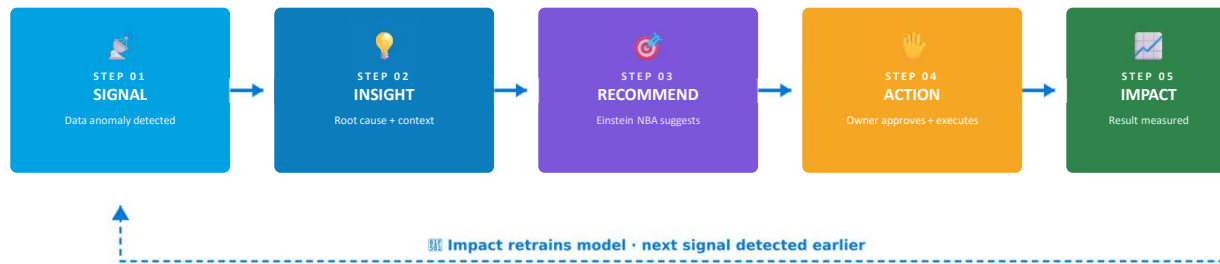

Human-in-loop: analyst can adjust · Einstein re-learns from overrides

Business Insights — Signal to Action Loop

Analytics → Insight → Recommendation → Action → Impact — closed loop with Einstein Next Best Action.

01 · 5-STEP INSIGHT LOOP

WORKED EXAMPLE — Walked through the 5 steps

Signal: WalMart CocoPops units down 12% in W28 vs baseline

Insight: Retailer failed to run scheduled TPR · IR photo shows shelf tag missing at 62% stores

Recommend: Withhold \$180K scan-back · notify KAM · reschedule promo to W32

Action: KAM approves in 1-click · fund credited back · new promo scheduled with contract clause

Impact: \$180K saved · W32 rerun delivered +19% lift · compliance clause now standard

Cycle time signal → action: ≤ 24 hours (vs 3 weeks in manual)

02 · INSIGHT CATALOG

Anomaly
Unexpected drop / spike in KPI

Diagnostic
Root-cause analysis (why?)

Predictive
Forecast · what will happen

Prescriptive
Recommended action + expected lift

Autonomous
System executes low-risk actions itself (approve, reroute)

Maturity target: 40% autonomous · 40% prescriptive · 20% human review
