

Report Types — Flow Chart

Choosing the right report type: standard vs custom, single vs multi-object

Report Type Comparison

Dimension	Standard	Custom	Joined
Setup effort	None (OOTB)	Admin config	Multi-block
Objects	Standard only	Std + Custom	Up to 5 blocks
Join relations	Fixed	Up to 4	Custom joins
Field editing	Limited	Full - Bucket - Formula	Per-block
Cross-filter	No	Yes	Yes
Use case	Quick OOTB dashboards	CG-specific pipeline & TPM	Won vs Lost side-by-side

CG Example

"Distributor performance vs quota" needs Account + Order + Quota + Promotion → Custom Report Type (Multi-Object) with formula fields for attainment %.

Executive Dashboard — CGO View

Mock-up of a Chief Growth Officer dashboard — components & drill-down anatomy

KPI Library — Field Sales & TPM

The metrics that drive Consumer Goods commercial execution

01 · Field Sales KPIs

Execution at the Store

Coverage

Store Visit Compliance %

Planned visits executed / scheduled

Productivity

Strike Rate

Productive visits / total visits

Order Value

Avg Order Value (AOV)

Total revenue / order count

Distribution

Numeric & Weighted Distribution

Stores carrying SKU / universe

In-Store

Perfect Store Score

Compliance across MSL, share, POS

Availability

Out-of-Stock (OOS) %

SKUs unavailable at shelf

Quota

Quota Attainment %

Actual sales / target

Efficiency

Time in Store / Route Time

Selling time vs travel time ratio

02 · Trade Promotion KPIs

Promotion Effectiveness

ROI

Trade ROI

Incremental margin / trade spend

Uplift

Incremental Volume %

Promoted vol – baseline / baseline

Cannibalization

Halo & Cannibalization

Adjacent SKU lift or decline

Spend

Trade Spend % of NR

Total trade / net revenue

Compliance

Promo Compliance Rate

Stores executing per contract

Forecast

Forecast Accuracy %

Actual vs plan uplift variance

Depletion

Sell-Through Rate

Units sold / units shipped

Freshness

Deal Effectiveness Score

Composite: ROI × compliance × uplift

End-to-End Business Process — Flow Chart

Plan → Trade → Sell → Fulfill → Analyze — end-to-end CG execution on Salesforce

01

Strategic

Plan

- Annual planning & targets
- Territory design
- Customer segmentation
- Trade fund allocation
- Quota setting
- Route optimization

02

Commercial

Trade & TPM

- Promotion planning
- Deal & contract mgmt
- Pricing conditions
- Volume forecast
- Approval workflow
- Contract signing

03

Field

Sell & Visit

- Store visit execution
- Order capture (mobile)
- Perfect Store audit
- Merchandising check
- Competitor intel
- Payment collection

04

Operational

Fulfill

- Order → SAP
- Credit check
- Delivery scheduling
- Warehouse pick/pack
- Distribution
- Invoice & billing

05

Insight

Analyze

- Sell-out analytics
- Promotion ROI
- Attainment reports
- Predictive AI
- Perfect Store trend
- Feedback → Plan

Systems Powering Each Stage

SF Objects · Systems

- Territory Mgmt
- Quota & Forecast
- Segment Model

SF Objects · Systems

- TPM · Promotion
- Contract · Deal
- Pricing Conditions

SF Objects · Systems

- Visit + Task
- Order · Mobile
- Retail Store Audit

SF Objects · Systems

- SAP S/4HANA
- WMS / Logistics
- Billing Doc

SF Objects · Systems

- Reports · Dashboards
- CRM Analytics
- Data Cloud · Tableau

← FEEDBACK LOOP · Insights inform next planning cycle →

Salesforce Consumer Goods Cloud unifies these 5 stages on one platform → single source of truth from HQ to shelf

Retail Sales & Promotion Scenarios

Two flow-chart scenarios walked through step-by-step

Scenario A

Retail Sales Visit — Store Rep Journey

Scenario B

Promotion Management — TPM Cycle

Distributor & Channel Sales — Wiring

How goods, data, and money flow across the go-to-market channels

Distributor & Channel Sales Best Practices

Six patterns that separate winning route-to-market execution

Unified data model

One customer/outlet ID across all channels

Distributor portal

Self-service orders, claims, marketing assets

Secondary sales tracking

Sell-in vs sell-out visibility to retailer

Automated claims & rebates

Reduce disputes with rules engine

Joint business plans

Top-N distributors get JBP objects

Segmentation

Tier partners by value, invest accordingly

Wiring Legend

— GOODS · — MONEY · - - DATA

Salesforce holds the golden record of every entity across the entire route-to-market

Challenges & Deployment Best Practices

Common failure modes + a proven release pipeline

01 · Common Implementation Challenges

What Goes Wrong

Poor data quality from legacy systems

Duplicate accounts, missing hierarchies, stale contacts — cleanse BEFORE migration

Over-customization of Sales Cloud

Excessive Apex triggers, hard-coded flows — favor declarative + Consumer Goods Cloud OOTB

Integration point overload

Too many point-to-point connections — introduce middleware and canonical schemas early

Weak field adoption

Reps see it as reporting overhead — design MOBILE-FIRST, keep visit under 60 sec offline

Governor limit surprises

Batch loads hit SOQL / CPU limits in prod — load test in Full sandbox with real volume

Scope creep & unclear ownership

Business + IT + partner triangle — establish single accountable Product Owner per module

02 · Deployment Best Practices — Pipeline

CI/CD Release Flow

Golden Rules

✓ 75% code coverage minimum

✓ Metadata source of truth in Git

✓ Feature toggles for risky changes

✓ Automated rollback plan tested

✓ Release notes + user training

✓ Hypercare window post go-live
