

# Order Capture — Flowchart

Six-step guided capture on the CG mobile app — from assortment load to submit, offline-capable end to end.

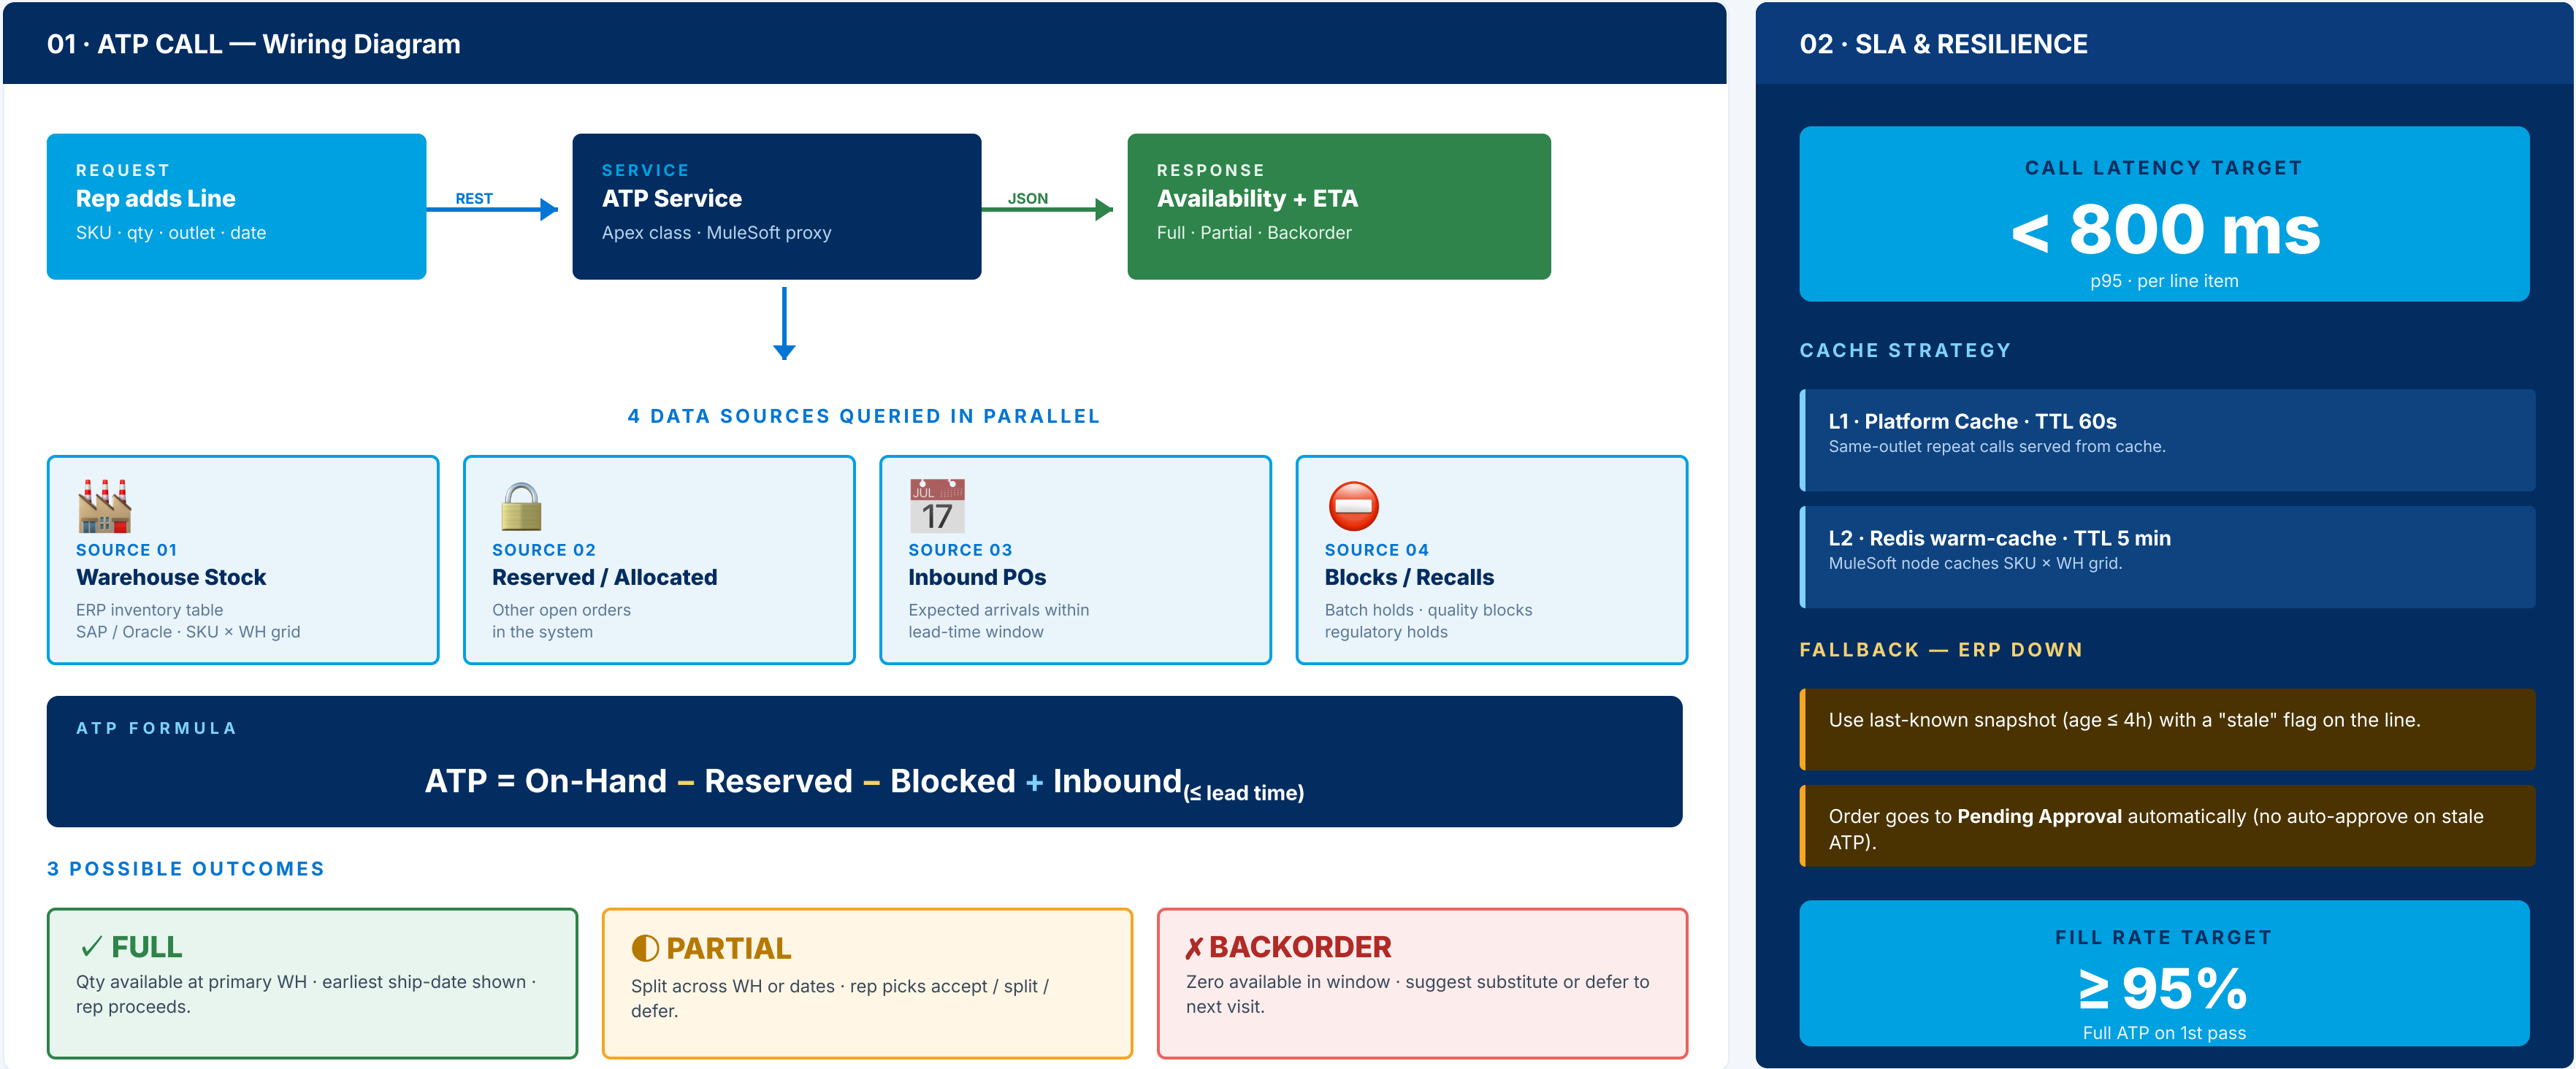

# Order Lifecycle — 8 States + Exceptions

Draft → Invoiced across 8 happy-path states, with 3 exception branches. Every transition writes to OrderStatusHistory.

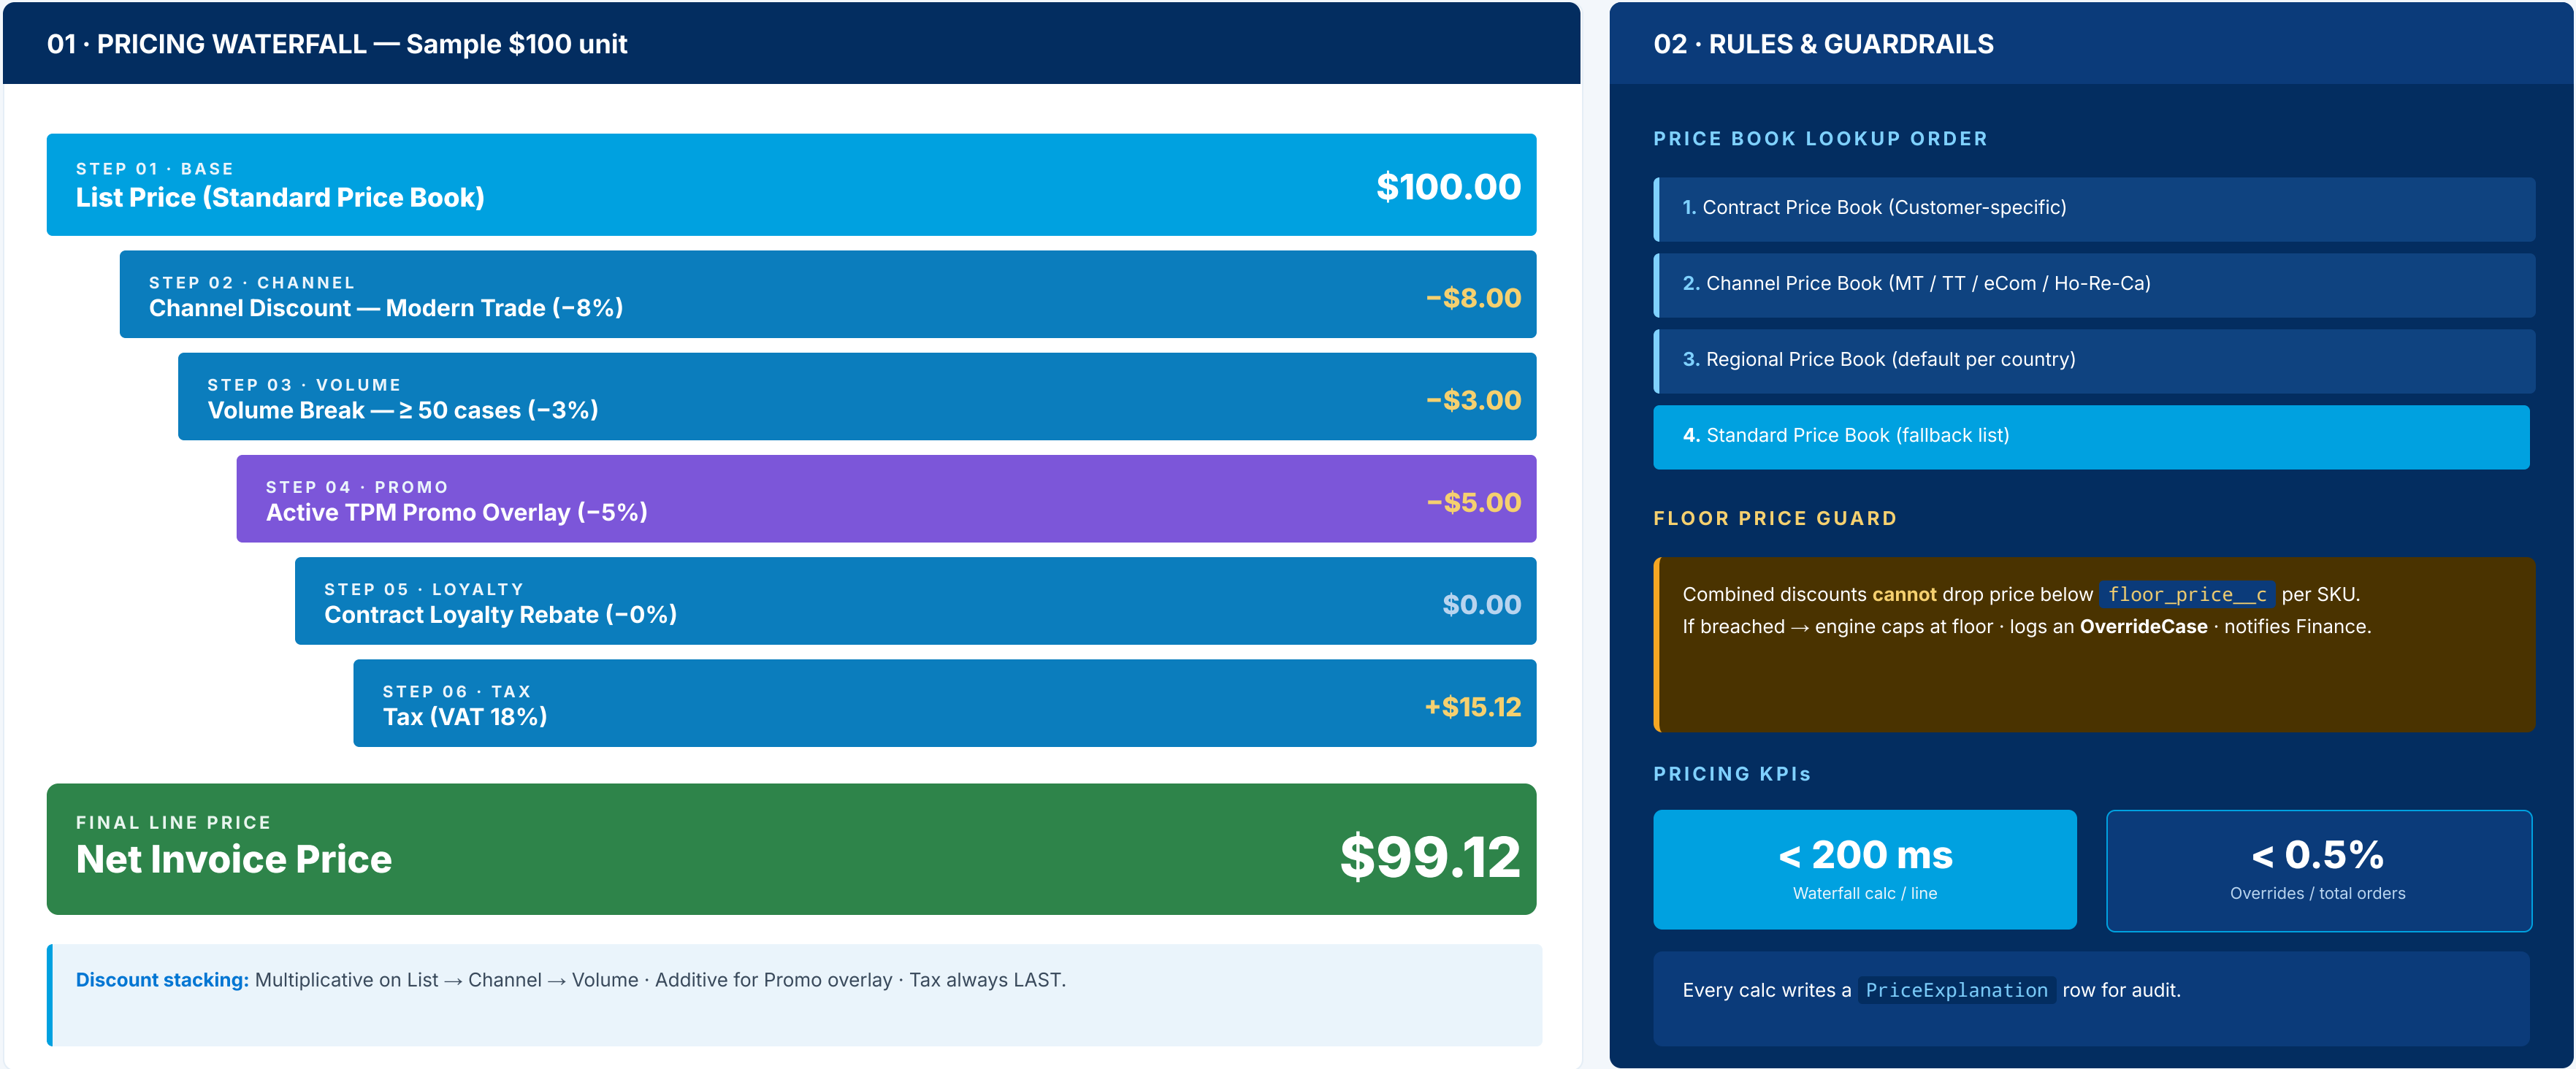

# Product Availability (ATP) — Wiring Diagram

Real-time Available-to-Promise check on every line item — 4 data sources, deterministic formula, 3 possible outcomes.

# Pricing Engine — Waterfall Calculation

Deterministic 6-step waterfall from list price to net invoice — priority is fixed, floor is guarded, every adjustment is logged.

# Discount Management

6 discount types · 3-tier approval matrix · guardrails against margin erosion.

## Discount Types & Block Diagram

01

### Channel Discount

Standing % off list, per channel (MT / GT / HoReCa). Baked into Price Book.

TYPICAL 5-10%

02

### Volume Break

Tiered % based on order or SKU qty (e.g. ≥ 50 cases → -3%; ≥ 100 → -5%).

TYPICAL 2-7%

03

### Promo Discount

Time-boxed offer from an approved TPM promotion — auto-applied to eligible SKUs.

TYPICAL 5-15%

04

### Loyalty / Contract

Negotiated with named accounts (JBP) — priority over channel default.

TYPICAL 3-12%

05

### Manual Override

Rep discretion (rare) — reason required · always routes to approval.

CAPPED · APPROVAL

06

### Free Goods / BOGO

Non-price discount — extra units instead of \$ off (Buy X Get Y at \$0).

STACKS SEPARATELY

#### STACKING RULES

### How they combine

- Additive:** Channel + Volume (both % off list)
- Multiplicative:** Promo applied to **post-discount** price (not list)
- Exclusive:** Loyalty / Contract **replaces** Channel (higher of the two wins)
- Floor guard:** Combined discount cannot pierce **floor\_price** · engine caps + logs

## Discount Approval Matrix

| DISCOUNT % | APPROVER       | SLA     |
|------------|----------------|---------|
| 0 – 5%     | Auto ✓         | Instant |
| 5 – 10%    | Territory Mgr  | 4h      |
| 10 – 20%   | Sales Director | 24h     |
| > 20%      | VP + Finance   | 48h     |

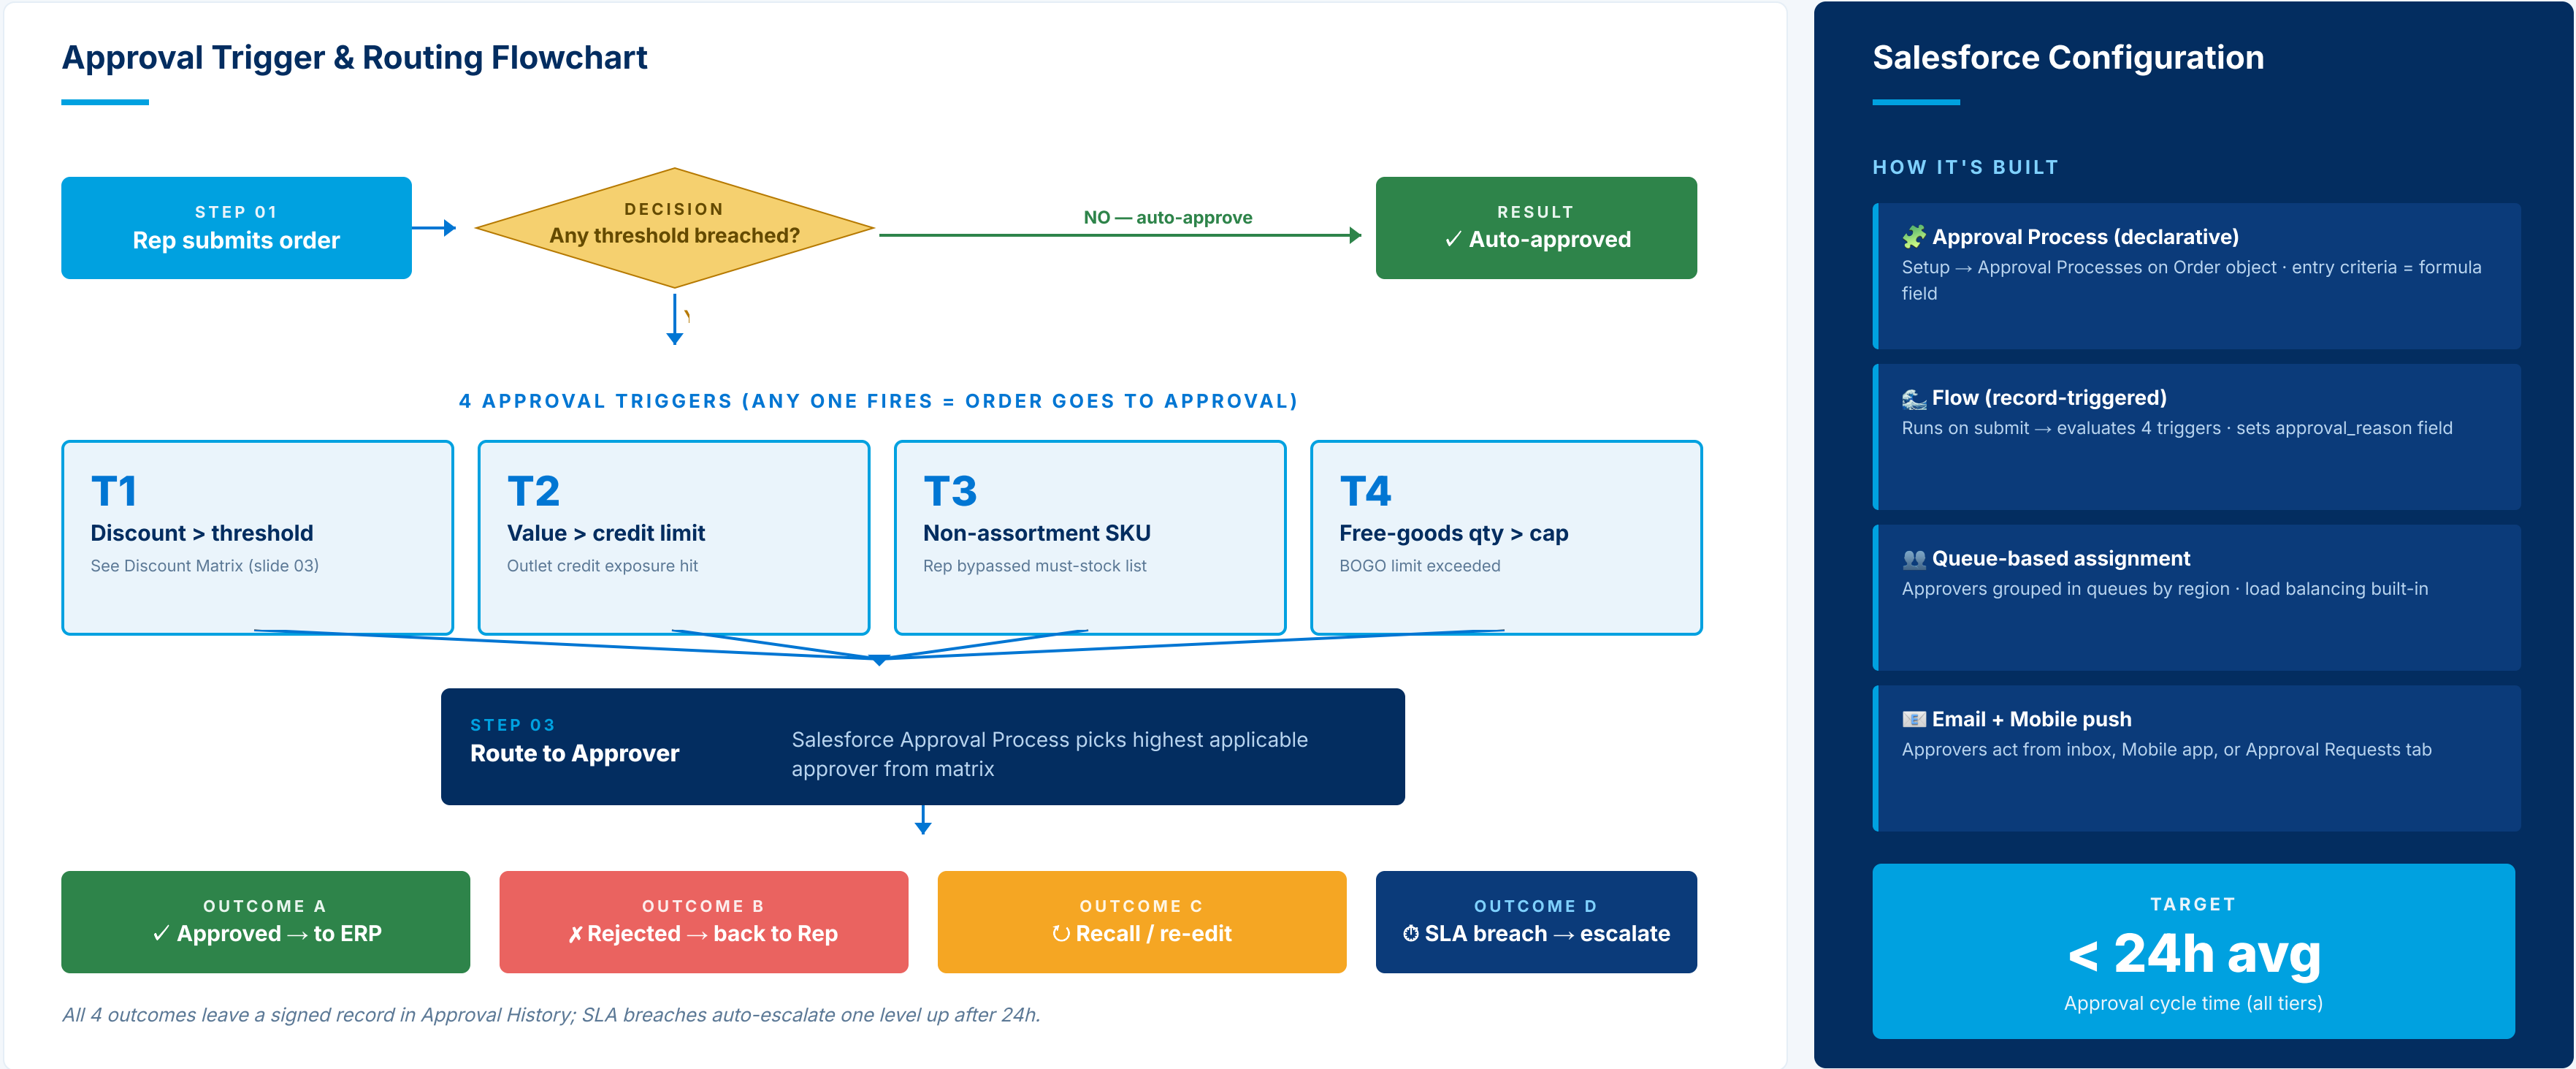

#### GUARDRAILS

- Every discount > 0% requires a **reason code**
- Combined discount checked against **floor\_price**
- Discounts audited monthly — **variance report** to Finance
- All approvals leave audit trail on **Order Chatter**

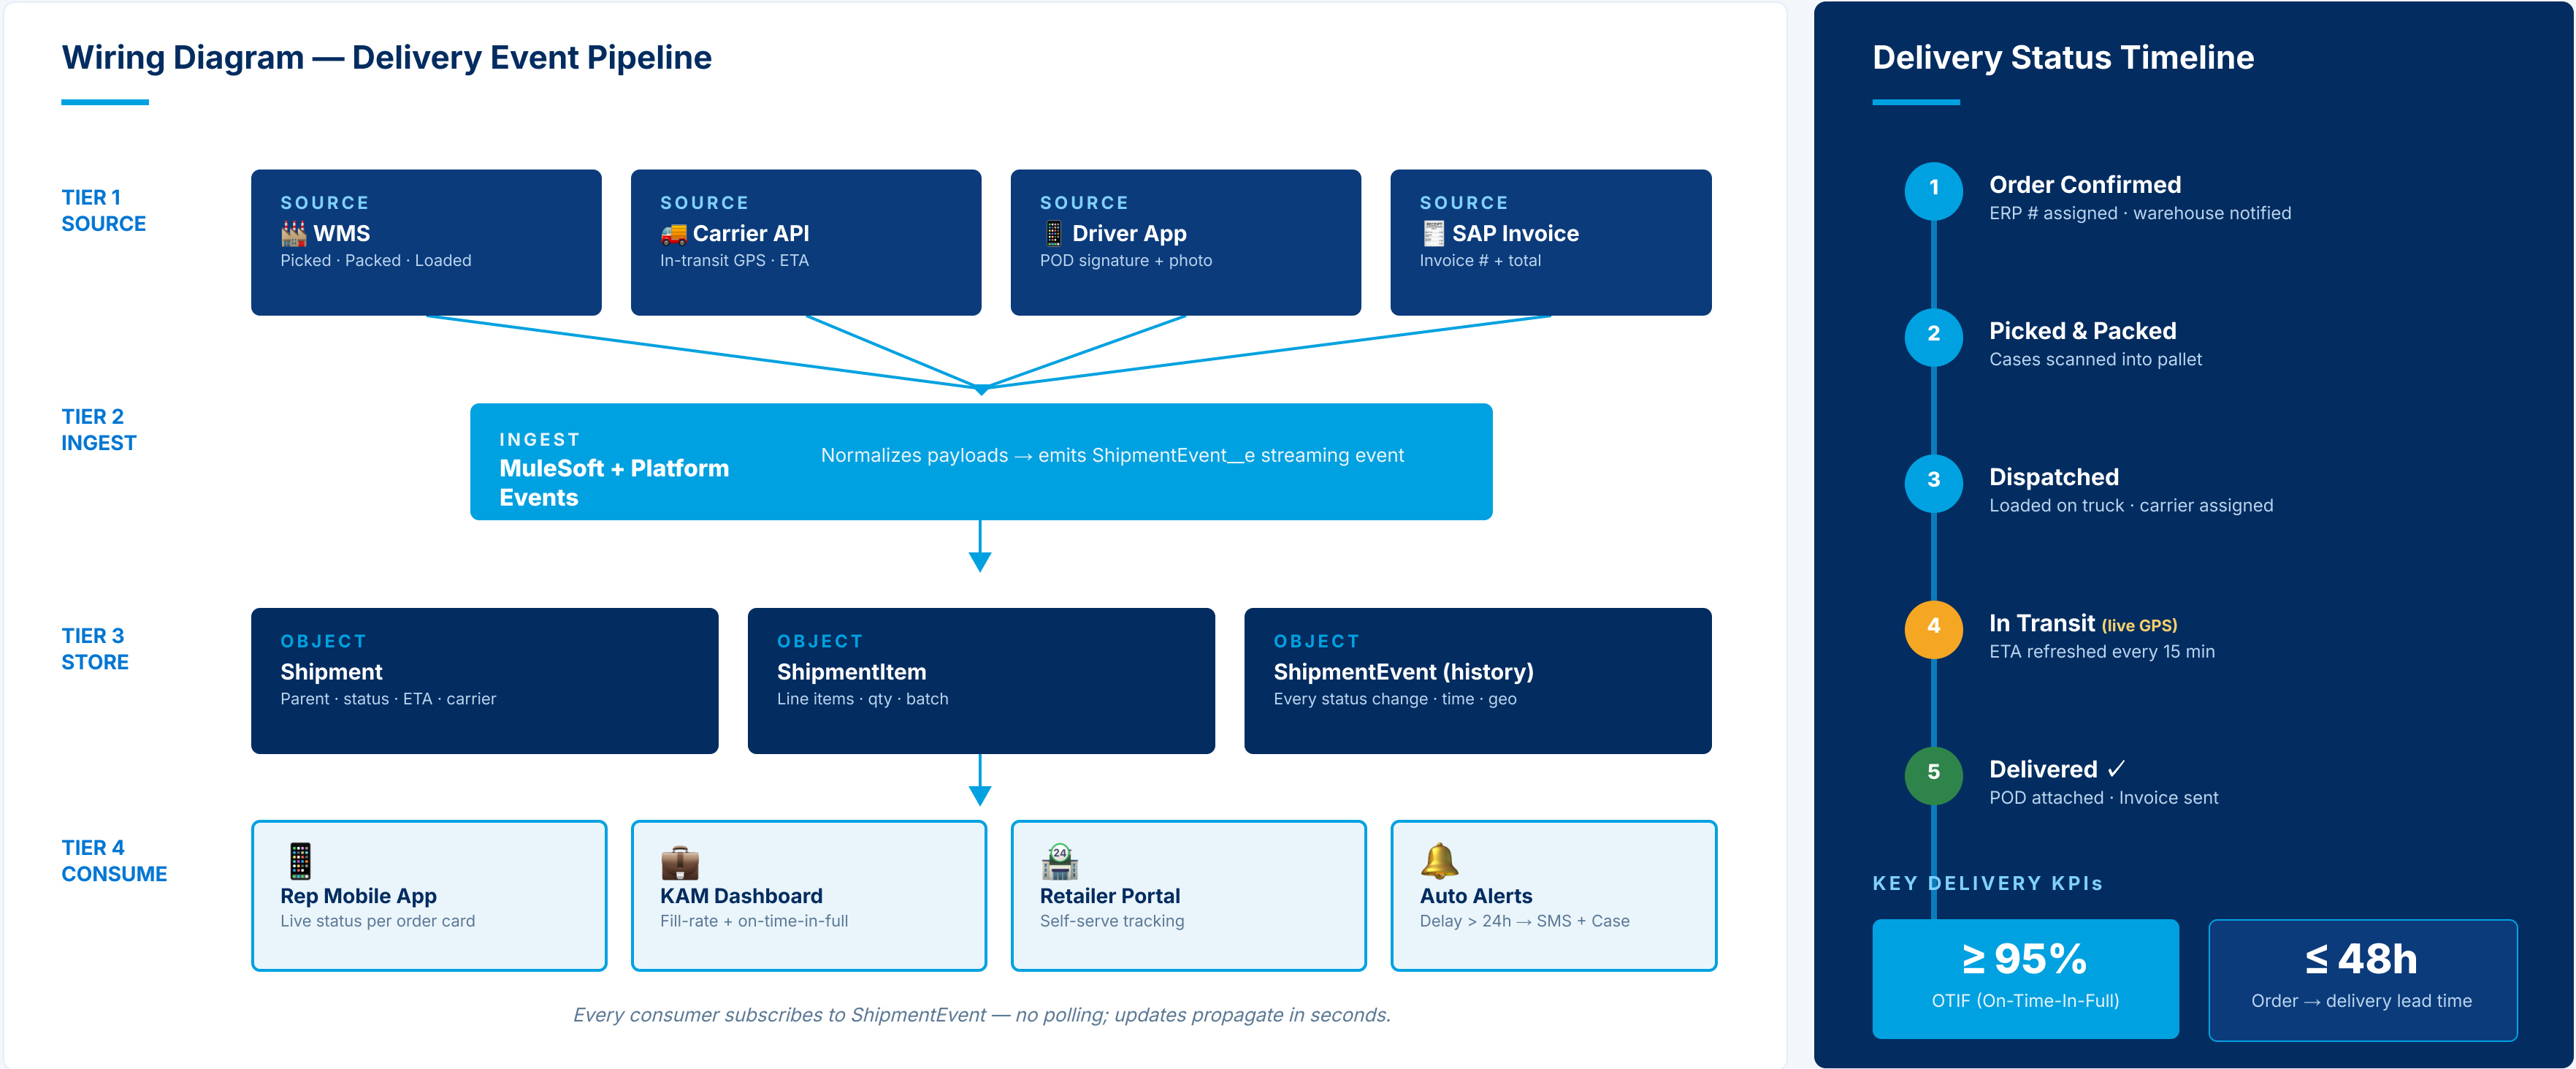

# Order Approval Process — Flowchart

Salesforce Approval Process rules that trigger when an order breaches any of 4 thresholds.

# Delivery Tracking — Order to Shelf

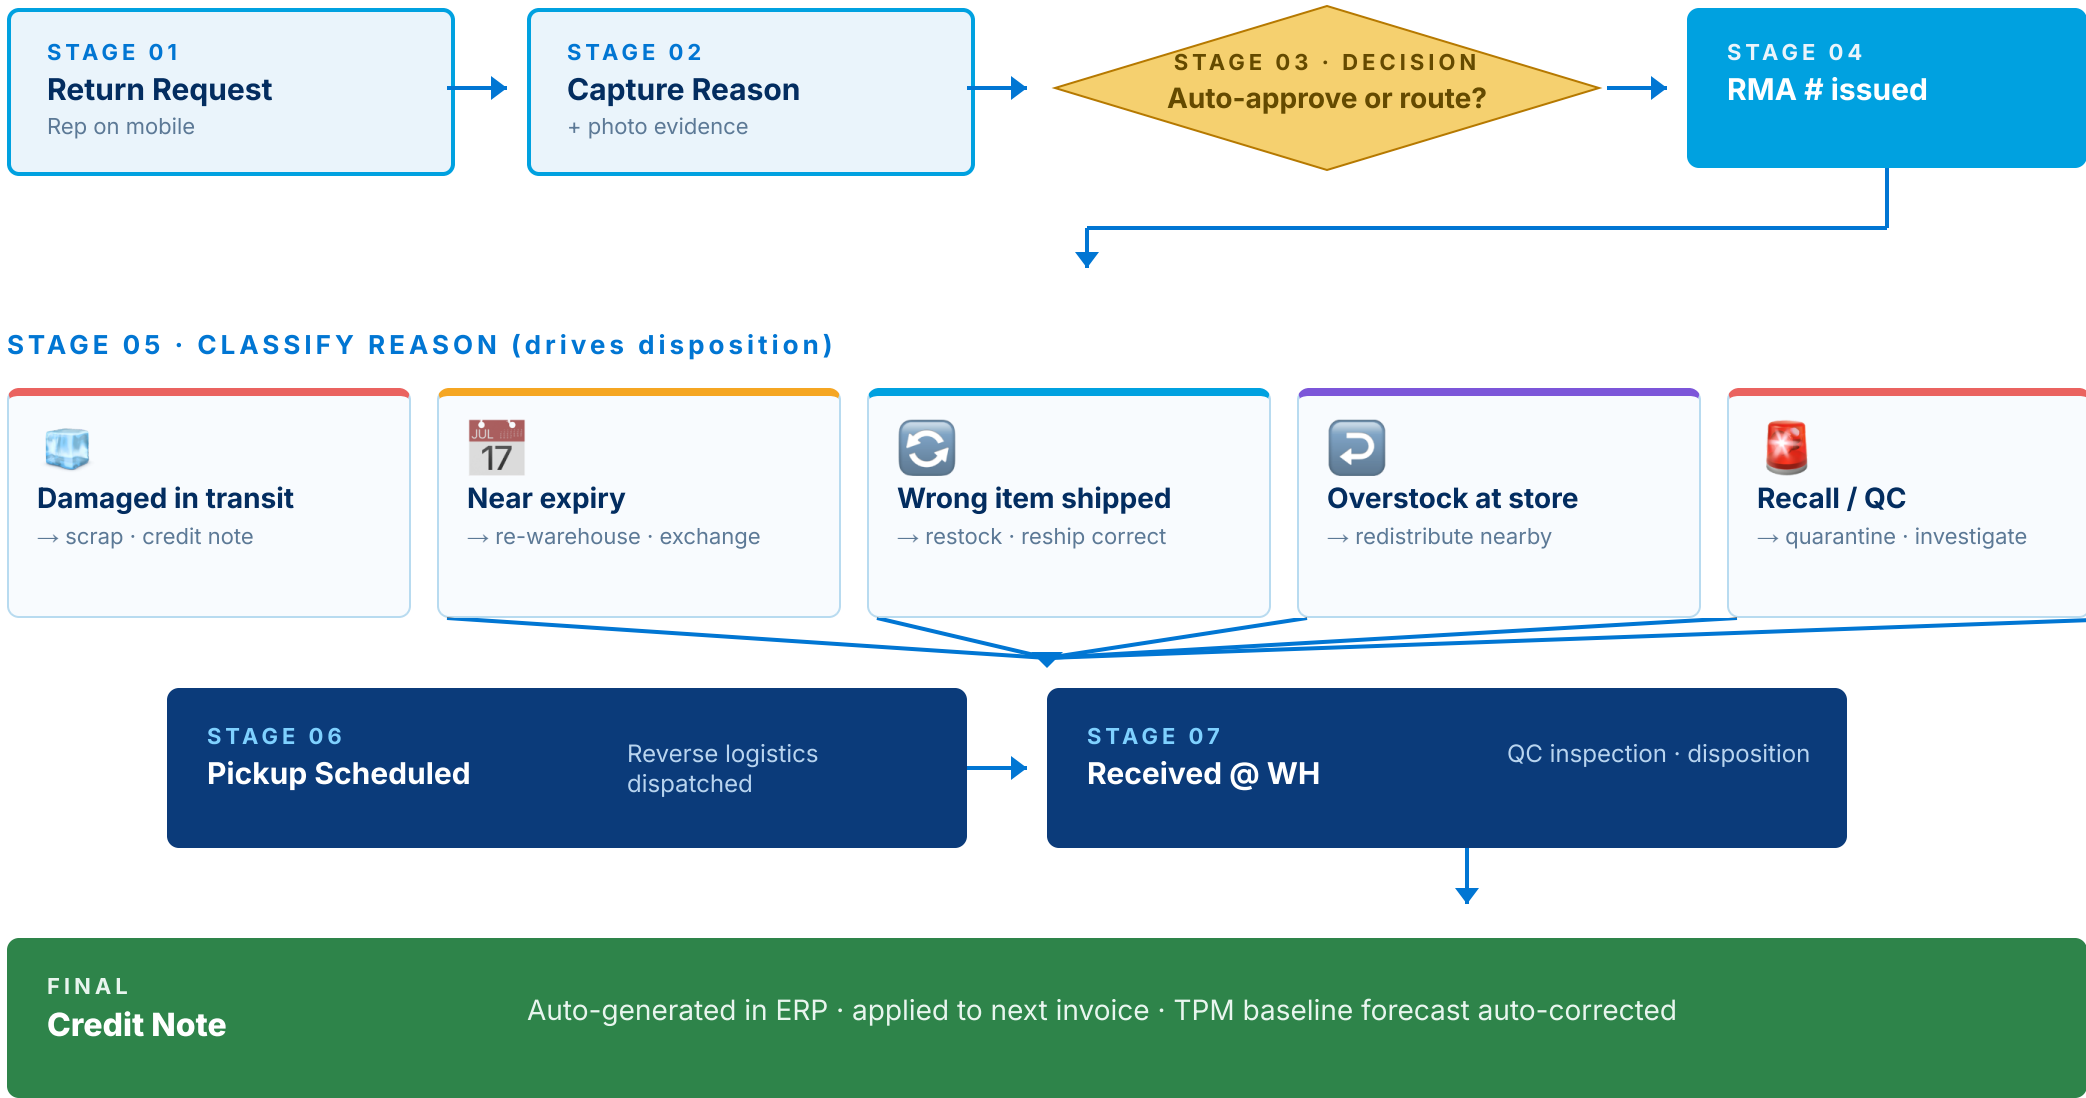

Wiring diagram — WMS & carrier events flow into Shipment records; Rep + KAM see live status.

# Returns Management (RMA)

Return Merchandise Authorization flowchart — from rep request through disposition to credit note.

## RMA Flowchart — 7 Stages

Every stage timestamps the RMA object; average end-to-end target: < 5 working days for credit note.

## RMA Record — Key Fields

- rma\_number** · unique · auto-numbered
- original\_order** · lookup to Order
- reason\_code** · picklist (5 types)
- disposition** · scrap · restock · destroy
- qty\_returned** · **credit\_amount**
- photo\_evidence** · Files (min 1)
- status** · Requested → ... → Credited

## RETURNS KPIs

TARGET

**< 2%**

Return rate (units returned ÷ shipped)

TARGET

**< 5 days**

Cycle time RMA → credit

**PATTERN DETECTION**

Einstein flags outlets or SKUs with return-rate anomalies (> 2σ from mean)  
→ alerts KAM for root-cause analysis.

# Mobile Configuration — Block Diagram

Six configuration layers admins tune per persona — from branding to Apex overrides.

6-Layer Mobile Configuration Stack

LAYER 06  
BRAND

🎨 Branding & App Splash

Logo · brand colors · splash screen · app icon · **configured in:** Mobile Publisher / Branding Set

LAYER 05  
LAYOUT

📱 Home Screen & Navigation

Tab bar · quick actions · card layout by persona · **configured in:** Mobile App Builder

LAYER 04  
ACCESS

🔑 Profiles · Permission Sets · Sharing

Which objects, fields & actions each persona sees · **configured in:** Setup → Users

LAYER 03  
DATA SET

📁 Briefcase & Sync Rules

Which records to pre-download for offline use · **configured in:** Briefcase Builder

LAYER 02  
WORKFLOW

🔄 Flows · Actions · Validation Rules

Business logic that runs on device or triggers on sync · **configured in:** Flow Builder

LAYER 01  
CUSTOM

⚙️ Apex Callouts · LWC · Mobile SDK Plugins

Only when declarative layers fall short — barcode SDK · offline validators

Config Set — Persona Matrix

| SETTING           | FIELD REP | MERCH.    | KAM       |
|-------------------|-----------|-----------|-----------|
| Home tab          | Visits    | Tasks     | Accounts  |
| Order Capture     | •         | ◦         | •         |
| Shelf Photo (AR)  | •         | •         | ◦         |
| Approval Inbox    | ◦         | ◦         | •         |
| Offline data (MB) | ~ 12      | ~ 6       | ~ 25      |
| Dashboards        | Personal  | Task list | Territory |

• Enabled · ◦ Hidden by permission set

DEPLOYMENT PATH

01 · Configure in **Sandbox** → deploy via Change Sets / DevOps Center

02 · Push **MDM policy** (Intune / Jamf) — no App Store update needed

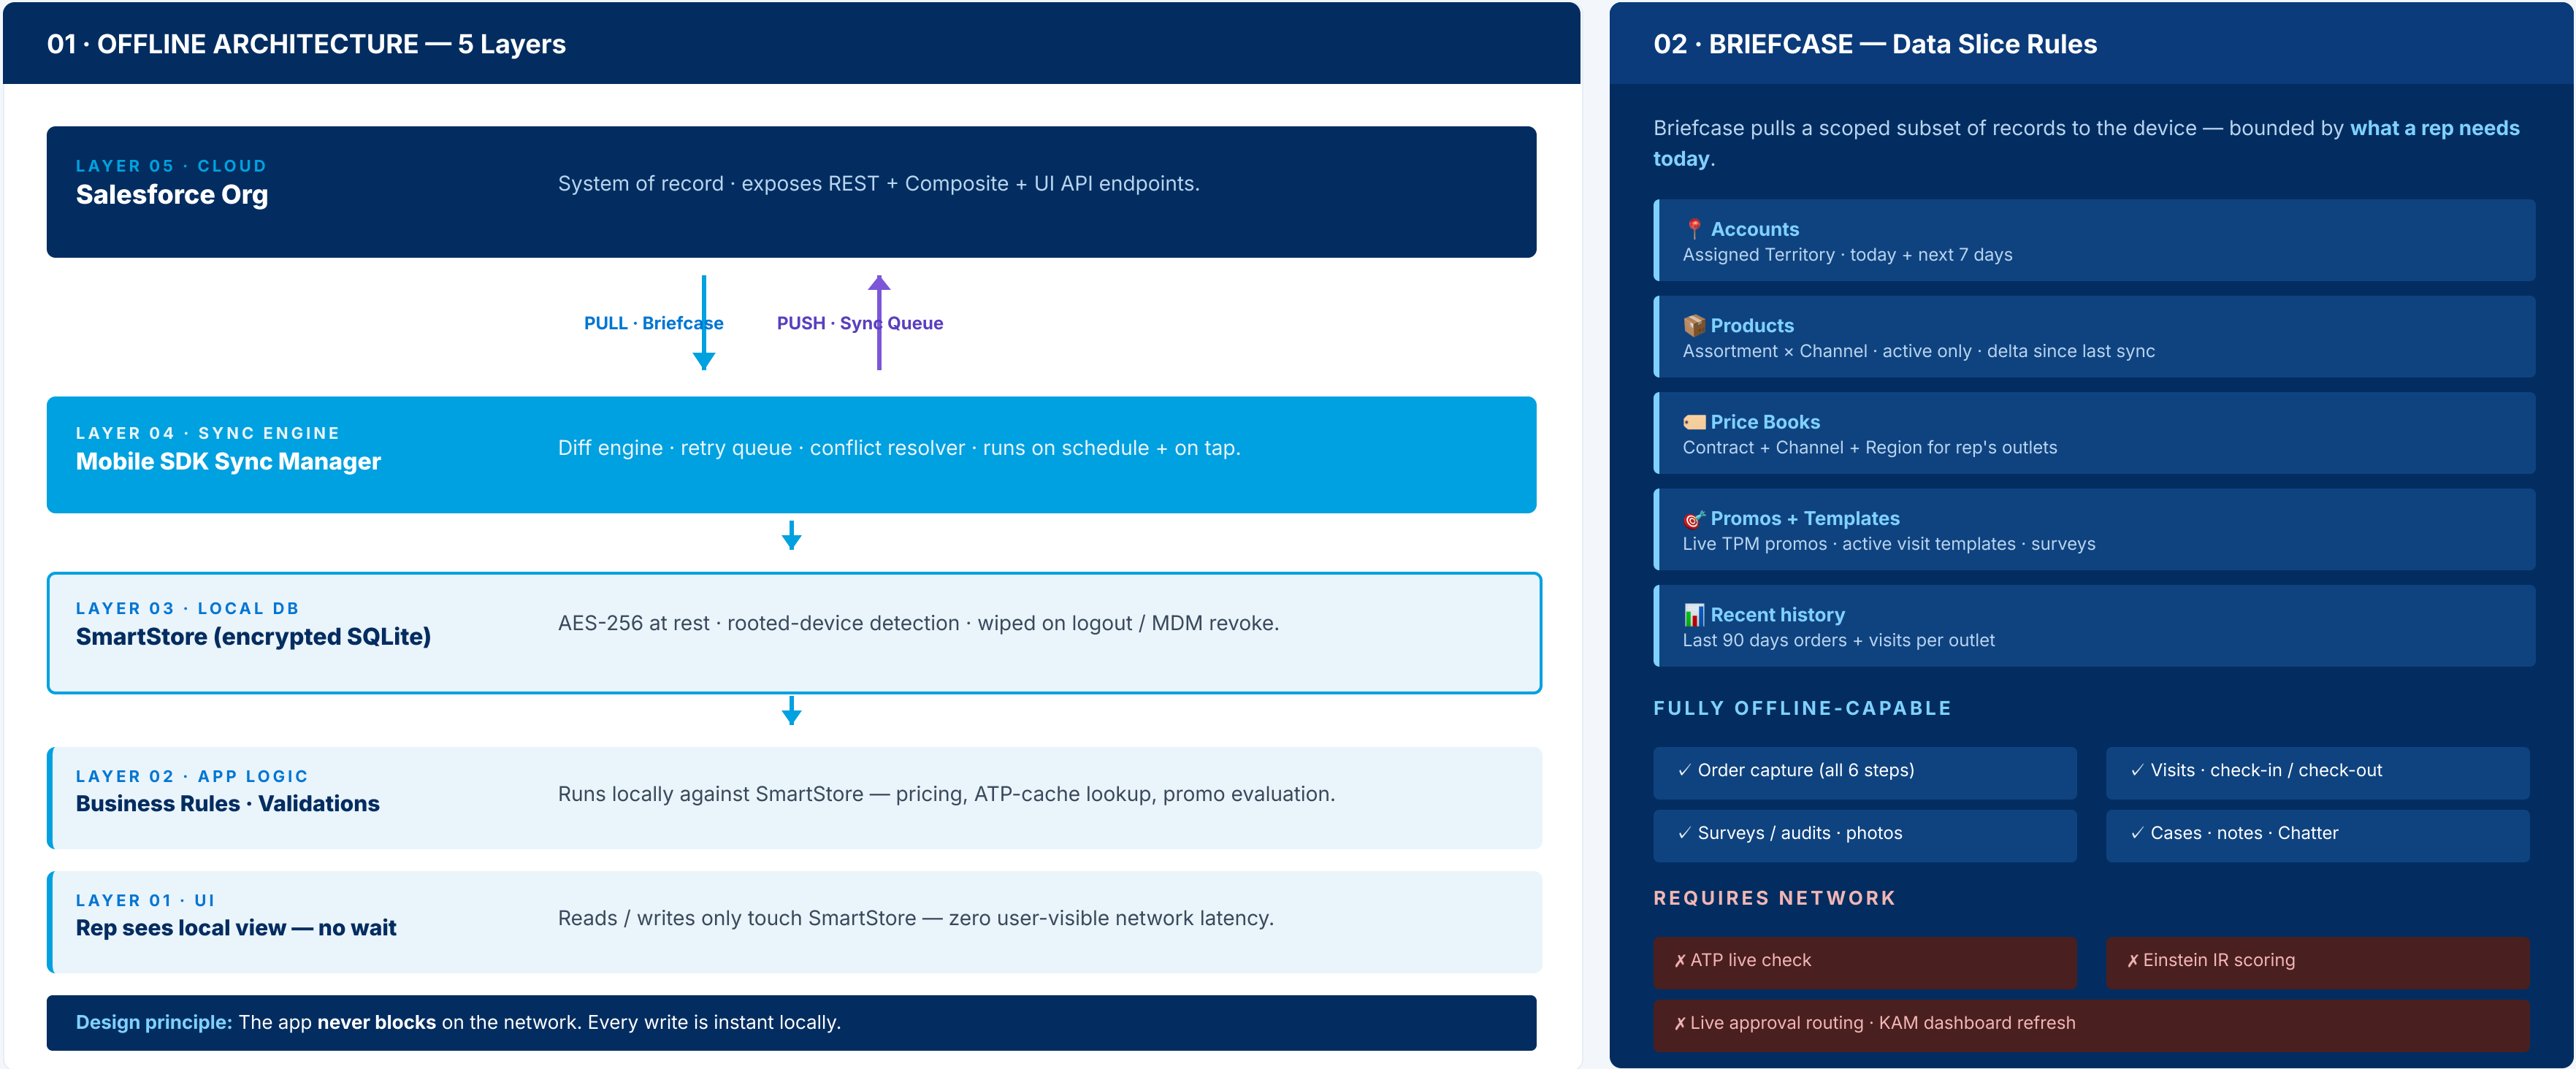

03 · Reps **pull config** on next login — layout re-renders live

Salesforce CG Cloud & TPM — Module 5 & 6 (Order Management & Mobile App)

09 / 15

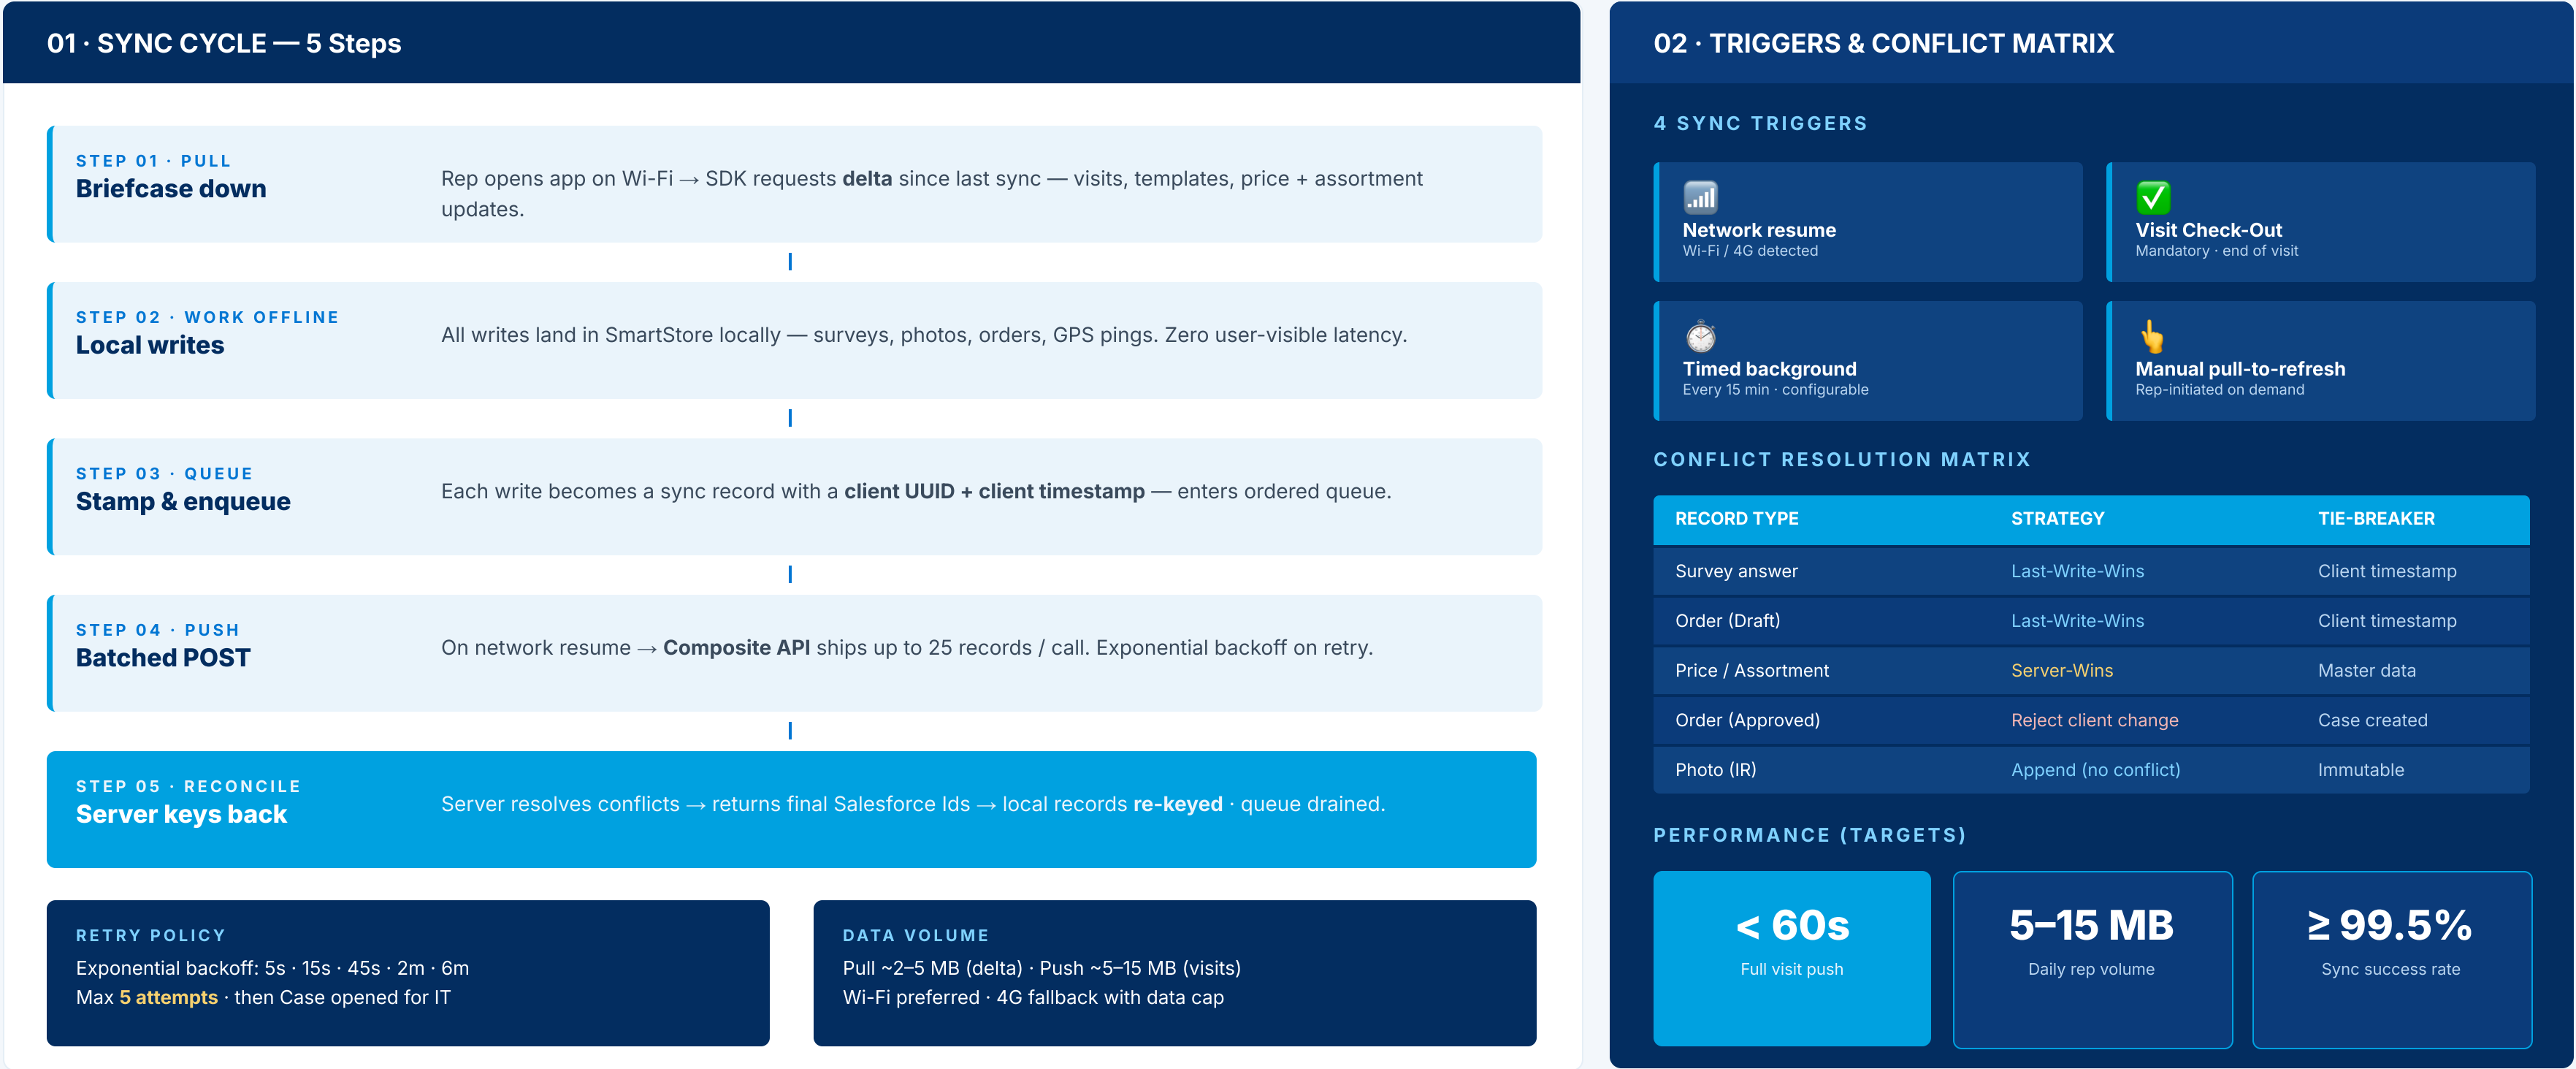

# Offline Capability — Block Diagram

Briefcase-driven data slice • encrypted local DB • zero-blocking UI. Full workday supported without network.

# Mobile Synchronization — Wiring Diagram

5-step sync cycle · 4 triggers · deterministic conflict resolution — full workday flushed in < 60 s.

# Field Sales Productivity & Activity Tracking

Rep day-in-the-life flowchart · every action becomes tracked Activity data for coaching & incentives.

01 · A REP'S DAY — Productivity Flowchart

08:00

Morning huddle → Auto opens deck with yesterday KPIs · today's route · promo alerts

08:30

Depart → Route auto-loads in maps · GPS tracking on · first visit ETA calculated

09:00

Visit 1 · Store #001 → Check-In → Audit → Photo → Order (12 lines · \$2.4K)

10:30

Visit 2 · Store #045 → OOS on 2 SKUs · auto-added to order · Case opened for KAM

12:00

Lunch buffer → App pauses tracking · queued items sync in background

14:00

Visits 3-5 → Standard flow · Einstein suggests promo bundle at Store #208

16:30

Visit 6 → Follow-up on prior corrective action · verified fixed · Case closed

17:30

End of day → Full sync · KPI recap · tomorrow's route confirmed

DAY TOTAL

6 visits · 9.5h

\$14.2K order value · 47 survey answers · 18 photos · 4 cases opened / 3 closed

02 · ACTIVITY TRACKING — Data Pipeline

EVERY REP ACTION → ACTIVITY RECORD
